

Axis Communications' Academy

AXIS Camera Station Training

Length: 1 day

Format: classroom

Course description

This training is a technical course that will give you the skills you need to successfully deploy and manage AXIS Camera Station. Topics such as installation and setup with automatic camera discovery, event configuration and efficient management of the Axis network video products in the system are explored in theory lessons combined with hand-on labs.

Course objectives

You will learn how to:

- > Plan, install and use AXIS Camera Station
- > Configure split views, hotspots, sequences, maps, and PTZ functionality
- > Setup recordings and alerts
- > Configure video format, resolution and frame rate
- > Estimate and configure storage space

Who should attend?

Professionals working with system integration and network video design that want to gain practical knowledge on how to use and configure AXIS Camera Station.

Prerequisites

In order to get the most out of the training, and get an introduction to AXIS Camera Station, we recommend all students to spend 30 minutes on Axis' web-based AXIS Camera Station training. (www.axis.com/academy/web-based.htm)
