## Axis offers new software application for core video surveillance

**Axis Communications today introduced the AXIS Camera Recorder, a new network video software application providing all core recording and monitoring functions. With this product, Axis continues to strengthen its position in the fast growing network video market.**

In combination with Axis' market leading network cameras and video servers, AXIS Camera Recorder provides the perfect solution for small businesses in need of video surveillance at a competitive price level. The product's ease of use combined with functions such as motion detection, e-mail-based alerts and an activity-level based search function makes video surveillance available for a broader customer base.

This software is ideal for video recording and monitoring applications in schools, stores, industries and other institutions seeking to use their existing investments in network infrastructure.

The AXIS Camera Recorder will be available through Axis' distribution channels in May, 2003. Product images are available at: [www.axis.com](http://www.axis.com)

### **About Axis**

*Axis increases the value of network solutions. The company is an innovative market leader in network video and print servers. Axis' products and solutions are focused on applications such as security surveillance, remote monitoring and document management. The products are based on in-house developed chip technology, which is also sold to third parties.*

*Axis was founded in 1984 and is listed on the Stockholmsbörsen (XSSE:AXIS). Axis operates globally with offices in 14 countries and in cooperation with distributors, system integrators and OEM partners in 70 countries. Markets outside Sweden account for more than 95 % of sales. Information about Axis can be found at [www.axis.com](http://www.axis.com)*
