Axis announces innovative surveillance solution with full 360° overview and detailed zoom

AXIS Q6000-E Network Camera is an innovative network camera offering a 360° overview provided by four 2 megapixel camera heads, and when integrated with AXIS Q60-E it simultaneously offers high detail optical zoom on areas of interest, with just one click.

Axis Communications, the world leader in network video, announces AXIS Q6000-E, an outdoor-ready 360° network camera that integrates seamlessly with the AXIS Q60-E Series of PTZ dome network cameras, providing a unique surveillance solution.

With just a single click, operators can optically zoom in on details of interest with high precision while at the same time being able to maintain an overview of large areas of up to 20.000m² (215,000 sq. ft.) – about the size of four football fields. This makes the AXIS Q6000-E ideal for city surveillance applications such as monitoring of public squares and parking lots, as well as food courts in shopping malls and other open areas.

“The AXIS Q6000-E addresses the need for a simple way to monitor a wide area and, simultaneously, be able to optical zoom in on details,” says Erik Frännlid, Director of Product Management, Axis Communications. “The seamless integration with AXIS Q60-E Series of outdoor PTZ cameras provides a smart, innovative and space-efficient solution offering new and unique video surveillance possibilities.”

This new product will open up new opportunities to solve a common problem, for example in the city surveillance field where there is a need for both a PTZ camera to provide detail, and for a full overview camera to cover the entire area. A single click on any object in AXIS Q6000-E, using the one-click PTZ control feature, will trigger the AXIS Q60-E allowing operators to optically zoom in on the specific object of interest. The use of two screens gives a full 360° overview from AXIS Q6000-E, and a zoomed-in view from AXIS Q60-E, providing operators with a high level of detail while simultaneously being able to maintain an overview of the entire monitored area.

AXIS Q6000-E provides multiple, individually configurable video streams in H.264 compression to greatly optimize bandwidth and storage without compromising image quality. Motion JPEG is also supported for increased flexibility.

Any AXIS Q60- E camera is quickly and easily mounted inside the AXIS Q6000-E, allowing also existing AXIS Q60-E installations to be upgraded to monitor wide areas, while simultaneously capturing every detail of interest, with just one click. There's no need for any mounting brackets or extra equipment as AXIS Q6000-E uses the same brackets and network cable as the AXIS Q60-E, minimizing time and cost of installation. Furthermore, AXIS Q6000-E is supplied with Power over Ethernet Plus (PoE+) through AXIS Q60-E, eliminating the need for power cables.

AXIS Q6000-E is supported by the industry's largest base of video management software through the Axis Application Development Partner Program. The camera includes support for AXIS Camera Companion, AXIS Camera Application Platform, ONVIF specification for interoperability of network video products and AXIS Video Hosting System (AVHS) with One-Click Camera Connection.

AXIS Q6000-E is planned to be available in Q4 2014 through Axis distribution channels.

About Axis

Axis offers intelligent security solutions that enable a smarter, safer world. As the global market leader in network video, Axis is driving the industry by continually launching innovative network products based on an open platform - delivering high value to customers through a global partner network. Axis has long-term relationships with partners and provides them with knowledge and ground-breaking network products in existing and new markets.

Axis has more than 1,600 dedicated employees in more than 40 countries around the world, supported by a network of over 65,000 partners across 179 countries. Founded in 1984, Axis is a Sweden-based company listed on NASDAQ OMX Stockholm under the ticker AXIS. For more information about Axis, please visit our website www.axis.com.
