

Chelmsford, Mass., April 28, 2015

Axis to showcase products, partnerships and education at Interop Las Vegas

Educational offering expands with launch of an IT focused network video training course; Axis network cameras selected for InteropNet

Axis Communications, the global leader in network video surveillance, will highlight key technologies, partnerships and educational offerings during Interop Las Vegas in booth #1219 from April 27 to May 1.

Axis will demo a variety of new products and technologies, including the recently announced AXIS A8004-VE Network Door Station for remote identification and entry management and AXIS Camera Station S10 Recorder Series for out-of-the box, reliable high definition surveillance solutions. Show attendees can also learn more about hosted video solutions and data center security with dedicated demos in the booth.

Value of education: Launch of IT focused training class

Axis announces a new two-day network video training class designed to introduce IT professionals to network video products and technologies. Network Video Fundamentals for IT is a hands-on course that provides attendees with the knowledge they need to specify the right products based on an end-user's environment, as well as install and support network video surveillance solutions. Classes are planned to start in June with more dates and locations expected to be added. The course will be available for \$299.

Show attendees are also invited to participate in 15-minute hands-on workshops with Axis Academy technical trainers at booth #1219 during the following times:

Tuesday, April 28 at 3pm and 5pm

Wednesday, April 29 at 11am, 1pm and 3pm

Thursday, April 30 at 11am, 1pm and 2pm

The power of partnerships

Axis is also participating in this year's InteropNet, an industry-leading example of a heterogeneous, temporary, volunteer-run network. The InteropNet provides high-speed network connectivity to the Interop attendees and exhibitors and supports the expo floor, conference sessions and wireless access. The InteropNet strives for 100 percent reliability and zero downtime. In addition, the InteropNet offers unique educational opportunities for the team of volunteers and the networking community at large.

Axis partner and industry leader Buffalo Americas will be in booth #1219 to demo the simplified digital security and surveillance (DSS) solution—including Axis network cameras, Buffalo NAS storage, AXIS Camera Companion, mobile viewing options and more—in an affordable, turnkey system based on Intel® technology. Ideal for small businesses, the Axis/Buffalo solution works out of the box with support for up to 16 cameras and requires minimal programming and technical expertise. The one-click set-up offers quick and seamless integration, allowing users to establish an IP-based camera network in minutes.

Speaking sessions

“What's Available and on the Horizon for Cloud Based Surveillance?”

Location: Mandalay Bay K

Date: Wednesday, April 29

Time: 11am - 11:45am

Speaker: Jennifer Bruce, business development manager, hosted video

“Video Surveillance as an Application Overlay to Traditional Network Infrastructure”

Location: Interop Theater, Booth #1275

Date: Wednesday, April 29

Time: 12 - 12:45pm

Speaker: Vince Ricco, business development manager for the Technology Partner Program

“IP Video Surveillance and the IT Factor: Who Owns the Physical Security Network?”

Location: Mandalay Bay L

Date: Wednesday, April 29

Time: 2 - 2:45pm

Speaker: Vince Ricco, business development manager for the Technology Partner Program
