The Axis Communications' Academy

Axis Communications, global market leader in the network video market¹, introduces the new Axis Communications Academy programme which will assist with educating and informing participants about the different aspects of IP-surveillance.

The academy consists of a number of different modular courses, beginning with a two-day Network Video Fundamentals course. This course, which is mandatory for Axis Solutions Gold and Solutions Silver partners, focuses on different application areas and gives an overview of essential topics like designing a network, video compression techniques and image quality troubleshooting. This training is also backed up by hands-on practical exercises throughout the course.

The content of this course is of a technical nature, targeted at sales engineers, technical sales support, technicians and business development from both an IT background and a CCTV background.

In the near future, Axis will also introduce a one-day Video Solutions fundamentals course which will provide advanced training on system solutions and design. With an emphasis on practical exercises, delegates will set up a full-scale surveillance solution under the supervision of an academy trainer which will enable them to deliver end-user tenders for mid-sized surveillance systems.

Upon completion of the course, delegates will receive Axis Certification which is a requirement for Solution Silver and Gold members of the Channel Partner Programme. Participants will also receive one of the new AXIS M-series Network Cameras.

More information about the Axis Academy can be obtained at www.axis.com/academy.

Notes to editors

1 Axis Communications is the global market leader in the network video market with a market share of network cameras of 33.5%. The world market for network cameras alone is forecast to be worth more than \$2.5 Billion by 2012. The network camera market is set to have a CAGR of more than 35 per cent per year over the next five years, according to industry analyst house IMS Research (www.imsresearch.com) in its latest market report entitled 'The World Market for CCTV and Video Surveillance Equipment 2008 Edition' published in November 2008.
