

Unleash the power of advanced security.

Axis and Nedap offer a cutting edge security solution.

Axis and Nedap's scalable solution offers the possibility to handle continuous changes. The solution provides customers seamless integration and possibility to expand over many doors and multiple sites.

Nedap's AEOS unified security management platform combines access control, intrusion detection, video management and locker management with network door controllers and video cameras from Axis into a truly integrated advanced security solution for enterprise customers.

The integrated solution is made possible through non-proprietary network security products from Axis. For access control, the AXIS A1001 Network Door Controller is an independent unit that can be installed at each door, completed with third-party door accessories such as sensors, door locks and readers. And for video surveillance, HDTV quality Axis network cameras provide reliable, high-quality video verification of access control events.

Tailored solutions for enterprise customers – Advanced security features

With AEOS, identity management goes beyond access at the front door, making it possible to set rules to ensure company security compliance. Anti-pass-back, for example, prevents two people entering using the same card. Likewise, a four-eye principal leveraging HDTV quality video from Axis cameras ensures that there is more than one person present. And customers can design customized responses to an unlimited number of scenarios, such as a video or access control event.

Many doors, many sites

With AEOS and Axis, there is no limit to the number of doors or even the number of locations customers can secure. All access control and video events can easily be managed from a single AEOS application for complete situational awareness from any location.

- > Unified security management platform
- > Seamless integration of many doors and multiple sites
- > Advanced security features
- > Easy to install and configure
- > Modular, cost-efficient solution

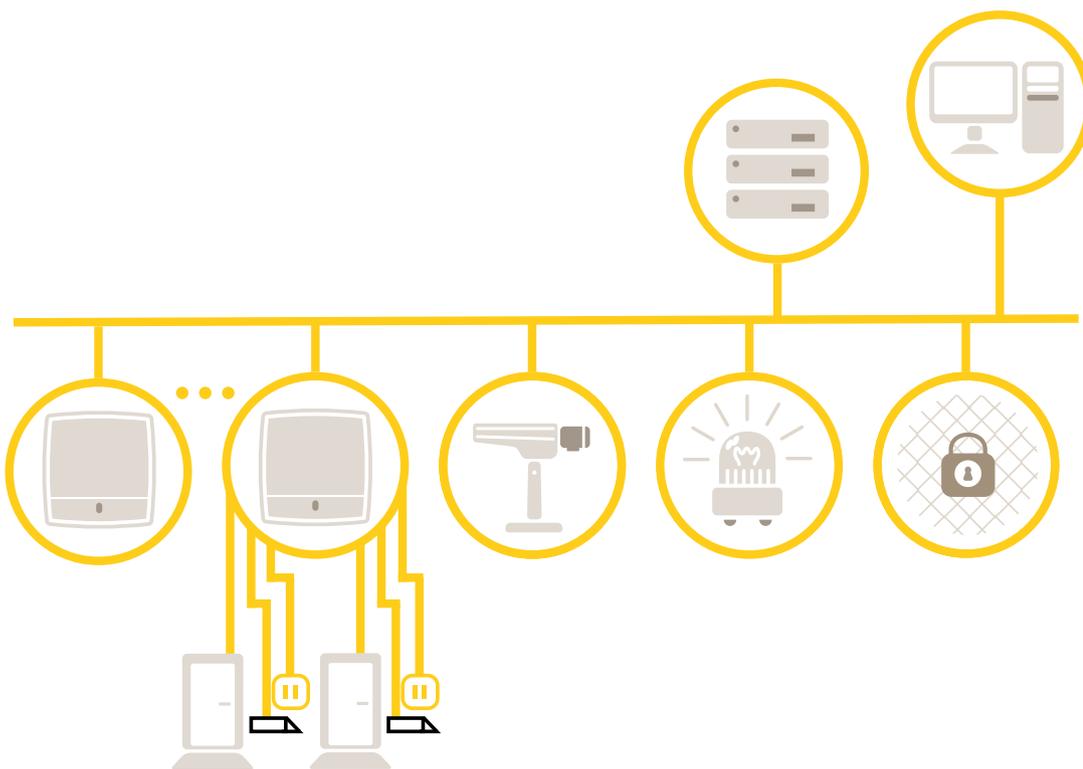

Flexible and cost-effective

Combining the integrated AEOS platform with open IP products from Axis gives customers a solution that is extremely flexible, future-proof and easy to use. The AEOS modular design allows for any building location or situation to be customized. It is also compatible with legacy hardware to fully leverage existing infrastructure. And while traditional access control solutions are inflexible to accommodate a maximum number of doors, the AXIS A1001 Network Door Controller allows customers to exactly match the number of doors for which they need access control. So customers only need to pay for the hardware and functionality they actually need today, while having the possibility to scale their system for future needs.

Easy and intuitive

By using an IP network the integration could be easily installed and configured with minimal cabling, Axis network door controller and cameras are easy to install and configure with minimal cabling. Color coded connectors and the configuration wizard in the AXIS A1001 enable fail-safe and effective installations.

With a shared commitment to the user experience, AEOS makes a vast array of functionalities extremely easy to use. With intuitive interfaces for specific users – companies can reduce mistakes, ensure compliance, increase efficiency, and improve security.

Summary of the Axis and Nedap solution:

Pioneers in our respective industries, Nedap has 35 years of experience in the access control industry. And as the inventor of network video nearly 20 years ago, Axis is driving the industry by continually launching innovative network products based on an open platform. Together, we offer customers a new level of freedom for integrated security management.

Why network video and access control?

- > HDTV quality video verification of access control events
- > Remote accessibility
- > Easy, future-proof integration
- > Scalability and flexibility
- > Cost-effectiveness
- > Distributed intelligence
- > Proven technology

Why Axis?

- > Worldwide #1 in network video, the world's leading expert
- > Proven installations across all continents
- > Broadest product portfolio in the industry
- > The largest installed base of network video products
- > Over 30 years of networking excellence

Why Nedap?

- > 35 years experience in access control
- > Offers the first software-based platform that is easy to adjust to your needs
- > Integral solution for access control, intrusion detection, video management and locker management
