

Software release 2.22

Software release 2.22 is an enhancement of the AXIS 7000 Network Document Server and replaces the previous software. All previously delivered AXIS 7000 units can be upgraded with the new software, which is available free of charge on the Axis web site. All features of the previous software are retained.

The main highlights are:

Support for additional scanning devices

- Fujitsu
 - M3091DC (A4, Sheet feed b/w, color and duplex)
 - M3092DC (A4, Sheet feed, flatbed, b/w, color and duplex)
 - M4097D in 3097 mode (A3, flatbed, b/w, ADF and duplex)
- Epson
 - GT-7600 (A4, flatbed, b/w and color)
 - GT-9600 (A4, flatbed, b/w and color, optional ADF)
 - GT-10000 (A3, flatbed, b/w and color, optional ADF)
 - Expression 1600 (A4, flatbed, b/w and color, optional ADF)
 - Perfection 1200S (A4, flatbed, b/w and color)
 - and others supporting ESC/I

Scan Counter

A scan counter functionality has been added to make it possible to monitor the use of the scanning device and enabling companies to build services around the scanning 'Clicks'. This functionality counts the number of scanned documents regardless of the size and profile used. The counter functionality has one total and one temporary counter. A new user called 'Service' controls the counters.
