

## PRESS RELEASE

11<sup>th</sup> April 2008

# Axis camera accessories offer extended installation possibilities

**Axis Communications, the global leader in the network video market<sup>1</sup> has announced new camera accessories for several of the company's network video cameras. The new accessories – dome housings, illuminators and pendant kits – add great value to integrators and end-users by offering extended camera installation possibilities.**

Among the new accessories are two weather-proof dome housings, AXIS T95A00 and AXIS T95A10, which support the company's wide range of PTZ (Pan, Tilt, Zoom) network cameras. The housings protect the cameras from water, dust, sunlight and low temperatures. Brackets that make it possible to mount the dome housings on walls, corners and on poles are also available.

Axis' new family of illuminators, AXIS T90A, is a series of infrared and white light illuminators with various distance and light projection capabilities. The illuminators provide additional light in applications where the surrounding lighting conditions may be insufficient for effective video surveillance.

Anders Laurin, executive vice president, Axis Communications commented:

“The main purpose of our accessories is to make the life easier for our customers. Now we present a number of accessories that enable integrators and end-users to overcome installation challenges caused by weather, lighting conditions and physical obstructions. The pendant kits make it possible to mount the cameras on poles and on various distances from walls, ceilings and corners.”

Steve Gorski, managing director, Axis Communications (UK) Ltd commented:

“We appreciate that our customers find themselves in such a wide variety of installation situations and as a company we are conscious of having a comprehensive range of accessories that can really support our customers.”

The accessories will be available during April through Axis' distribution channels.
