

M1054 network camera

The AXIS M1054 network camera uses progressive scan technology providing full frame rate video in resolutions up to 1 megapixel including HDTV 720p. Multiple H.264 and Motion JPEG streams can be provided simultaneously individually optimised for different quality needs and bandwidth constraints. It features an integrated PIR sensor for detecting movement even in the dark, and a white LED for illuminating the scene at an event. It additionally supports I/O ports for connecting external devices. Designed for easy and flexible installation, AXIS M1054 can be powered either over Ethernet or by power supply. AXIS M1054 easily finds application in boutiques, restaurants, hotels and residences.
