

PTZ dome network camera

AXIS Q6034 PTZ dome camera offers HDTV video, 18x optical zoom, and high-speed pan/tilt performance for coverage of large areas and great detail when zooming in. Designed with an IP52-rating for easy and reliable indoor installation, AXIS Q6034 PTZ Dome Camera is ideal for use in airports, train stations, casinos, stadiums and shopping malls.

The Q6034 provides HDTV 720p in compliance with SMPTE 296M standard of 1280x720 pixel resolution, full frame rate, HDTV colour fidelity and a 16:9 format. AXIS Q6034 can deliver multiple, individually configurable H.264 and Motion JPEG video streams simultaneously. H.264 greatly optimises bandwidth and storage use

without compromising image quality.

It provides 18x optical and 12x digital zoom with autofocus. Due to its HDTV resolution, the camera's 18x zoom provides not only a level of detail that is comparable to a 36x-zoom, 4CIF camera, but also the extra advantage of a wider, 16:9 field of view. The Q6034 features the Advanced Gatekeeper functionality, which enables the camera to automatically move to a preset position when motion is detected in a pre-defined area. The camera's day/night functionality ensures high image quality even in low light conditions. Support for High Power over Ethernet (High PoE) simplifies installation.
