AXIS COMMUNICATIONS

Axis is a Swedish-based IT company offering network video solutions for professional installations. Founded in 1984 and operating worldwide with offices in more than 20 countries, Axis is an innovative global market leader in network video, driving the ongoing shift from analogue to digital video surveillance. The products are used for security surveillance and remote monitoring, but also in installations in order to streamline customers' business processes. Based on open IP standards, Axis network cameras connect to any kind of IP network, including the internet, providing advanced video analytics features, such as motion detection, audio detection and tampering alarm solutions.

Retail: the introduction of network video has revolutionised the way retail professionals work with loss prevention, store optimisation, fraud detection, security and customer service.

Education: students and teachers hampered by the threat of harassment or violence will be comforted by the presence of reliable network cameras in the school's public spaces.

City Surveillance: Network video is one of the most useful tools for fighting crime and protecting citizens, acting both to detect and deter. In emergencies, network cameras can help police or fire-fighters pinpoint where their assistance is most needed.

Banking: solutions installed in local bank branches can transmit images to a central location for remote viewing us

Axis Communications has introduced a range of bundled “easy to install” digital video surveillance kits, intended to provide complete and future-proof IP-based video surveillance solution for SMBs at an affordable price point.

Featuring the AXIS M (AXIS M10, AXIS M11 and AXIS M32)Series, the digital video surveillance kits consist of four network cameras along with the AXIS Camera Station software for monitoring and recording. The proven, professional-grade software, which is in use at over 30 000 sites worldwide, can be installed on a standard PC and features automatic camera discovery and configuration, a flexible live view setup and an intuitive user interface. The kits are also easily expandable by tapping into Axis’ comprehensive portfolio of over 50 compatible IP camera models for any need.

“With our new bundled AXIS M-lines offerings, business owners get a complete digital video surveillance solution at an affordable price point. The new camera kits can be mixed and matched and are ideal for small retail shops, office environments and the education sector. They deliver high definition (HDTV) image quality for better identification as well as allow for remote monitoring,” says Roy Alves, country manager, Axis Communications SA.

The AXIS M3203 kit features discreet fixed dome cameras with motion detection, audio detection and detection of camera tampering attempts like blocking or spray-painting. The AXIS M1031-W kit includes four wireless cameras which can detect movement in the dark. “Business owners can

choose from seven different AXIS M Series kits to best meet their business needs.” adds Alves.

MTN keeps broadband news rolling

Friday, 07 September 2007, 09:36

MTN is ensuring it stays in the news spotlight this week. Having entered a bid for Telkom's fixed line business earlier this week, the company yesterday announced a reduction in broadband data tariffs.

iCredit for iPhone buyers

Friday, 07 September 2007, 09:26

When Apple slashed the price of its iPhone yesterday, in preparation for the Christmas buying season, angry customers who had bought the device at the higher price made sure their voices were heard - and Apple has responded with a credit.
