

## **Axis announces another high-performance network camera with H.264 compression**

Axis Communications, the global leader in the network video market<sup>1</sup>, introduces an addition to the new generation of network video products delivering multiple H.264 streams and superior image quality. AXIS P1311 network camera is the perfect solution for video surveillance systems with demanding storage and bandwidth efficiency requirements, such as schools, retail stores, banks and other office buildings.

"AXIS P1311 provides multiple H.264 streams as well as Motion JPEG streams simultaneously, either in full frame rate, or individually optimised for different quality needs and bandwidth constraints," says Executive Vice President of Axis Communications, Anders Laurin. "With its new robust metal casing, this fixed network camera is ideal for areas where a clearly visible camera is preferred for deterrence."

AXIS P1311 features superior image quality with progressive scan, providing crisp and clear images of both illuminated and low-light environments. In addition to H.264 and Motion JPEG, it supports MPEG-4 Part 2 for backward compatibility. For further flexibility regarding storage and bandwidth usage in the system, AXIS P1311 offers support for an optional SD/SDHC memory card for local video recordings. Power over Ethernet (IEEE 802.3af) supplies power to the cameras via the network, eliminating the need for power cables and reducing installation costs.

AXIS P1311 Network Camera includes video intelligence such as enhanced video motion detection, audio detection and detection of camera tampering attempts like blocking or spray-painting. It offers the market's most extensive suite of security and network management capabilities, including HTTPS encryption with preserved performance, IEEE 802.1X authentication, IPv4/IPv6 and Quality of Service.

AXIS P1311 Network Camera is supported by the industry's largest base of video management software through the Axis Application Development Partner program as well as by AXIS Camera Station. The cameras will be available in Q3 through Axis' distribution channels.

**About Axis Communications**

Axis is an IT company offering network video solutions for professional installations. The company is the global market leader in network video, driving the ongoing shift from analogue to digital video surveillance. Axis products and solutions focus on security surveillance and remote monitoring, and are based on innovative, open technology platforms.

Axis is a Sweden-based company, operating worldwide with offices in 18 countries and cooperating with partners in more than 70 countries. Founded in 1984, Axis is listed on the OMX Nordic Exchange, Large Cap and Information Technology. For more information about Axis, please visit our website at [www.axis.com](http://www.axis.com).
