Solutions that work with yours.

# Open-platform body worn solutions.

## Solutions that work with yours.

Axis body worn solutions give you superior image quality and video that holds up in court. You can plug them right into an Axis video management system (VMS) or use your own preferred system. And you can store video in the cloud or onsite. No matter what, you'll do a better-than-ever job of deterring and protecting, and of gathering documentation and forensic evidence.

**AXIS W101 Body Worn Camera**

An easy-to-use, lightweight and robust body worn camera with an operating time of over 12 hours at 1080p. It delivers sharp images even in challenging conditions and has dual microphones for excellent audio and noise suppression.

**AXIS W800 System Controller**

The central integration and management point of the body worn solution. It ensures a high speed and supervised data offloading from the cameras and has built in temporary storage. A single AXIS W800 supports up to five docking stations and 40 cameras and larger body worn systems can easily be extended with additional system controllers.

**AXIS W701 Docking Station 8-bay**

Charges the batteries and ensures easy data offloading of up to eight body worn cameras.

**AXIS W700 Docking Station 1-bay**

Charges the battery and ensures easy data offloading of a single body worn camera.

#### AXIS TW1100 Clip Mount

Easy to use slim clip mount with versatile mounting for many types of clothing.

#### AXIS TW1101 MOLLE Mount

Compact and sturdy for connection on MOLLE webbing found on tactical equipment and such.

#### AXIS TW1102 Magnet Mount

The magnet mount is a strong, rugged and versatile mount suitable for many types of clothing.

#### AXIS TW1103 Chest Harness Mount

Adjustable three-point chest harness to be used independent of clothing.

#### AXIS TW1200 Body Worn Mini Bullet Sensor

AXIS TW1200 Body Worn Mini Bullet Sensor attach to helmets or caps for a discreet alternative to filming with full-sized AXIS W101 Body Worn Camera.

#### AXIS TW1201 Body Worn Mini Cube Sensor

AXIS TW1201 Body Worn Mini Cube Sensor is small, lightweight, and exceedingly discreet. It attaches with an ingenious moveable mount to even the lightest of fabrics.

# Open, safe and scalable.

Use your Axis body worn cameras with an Axis VMS or a VMS or EMS of your choice. Open standards and low-cost docking stations with a separate system controller make them flexible, and easy and cost-efficient to scale.

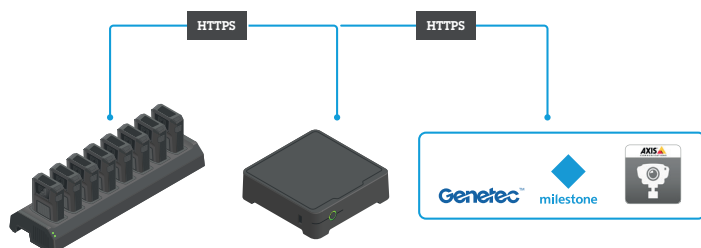

## End-to-end solutions for body worn

An end-to-end solution for your body worn camera system means you get a complete solution from Axis that suits your specific needs.

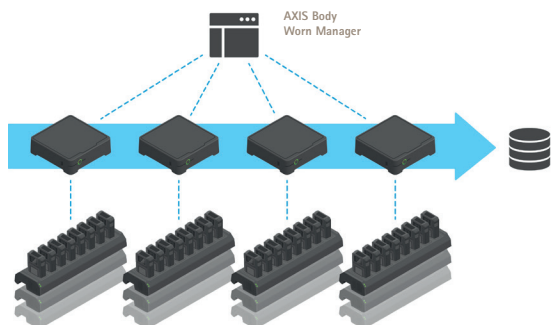

### AXIS Camera Station

AXIS Camera Station is a powerful Video Management System (VMS) with an intuitive interface for easy system management, incident handling, and quick export of high-definition video evidence. With a one-time license fee, AXIS Camera Station is a particularly good solution if you're looking for an on-premise solution or to integrate your body worn camera system with an existing Axis security solution.

## Core system

## Extended system

# Deter and protect – gather the evidence you need.

The benefits of body worn cameras in capturing evidence, deterring criminal behavior and training of officers and security personnel, are well-understood in the law enforcement sector and increasingly recognized in the private security industry.

**Law enforcement units e.g. police fire departments, prisons and government.**

**Private security units including retail, healthcare, commercial, industrial, education and banking.**

**Public utilities units like stadiums & venues and public transport.**

## Wearables made for you!

**Solution that delivers quality and reliability.** Axis is a pioneer and leader in video surveillance technology with more than 30 years of experience in developing solutions for almost every imaginable scenario. Quality has always been a main part of the Axis philosophy – be it in the product itself or in its usability. Body worn cameras are designed to withstand every condition the wearer endures – including impact, extremes in temperature and adverse weather – while producing consistently high-quality images and audio.

**The world's most flexible solution!** The Axis body worn solution can be used with a third-party VMS and EMS, on-premise or in the cloud, allowing for integration with other video surveillance data. It can also be delivered as an end-to-end solution, using AXIS Camera Station, the company's own VMS software.

**Double security for people and footage.** As with every device in the company's portfolio, Axis has ensured the highest level of security for the solution itself. Ultimately, the footage of body worn cameras might be needed in court, offering unbiased evidence of the incident and actions of all the parties involved. The process of transferring the video material off the camera and onto a server is fully automated, which means no human interaction is needed.
