

AXIS C1410 Mk II Network Mini Speaker

Speaker with wide-area coverage for voice messages

AXIS C1410 Mk II Network Mini Speaker is a discreet and affordable speaker that fits into smaller spaces and provides wide area audio coverage. It allows users to remotely warn off intruders before they commit a crime, to deliver instructions during an emergency or to make general announcements. Built-in memory supports pre-recorded messages, or personnel can respond to notifications with live speak. Digital signal processing (DSP) ensures clear sound. Open standards support easy integration with network video, access control, analytics, and VoIP. It also has a built-in PIR sensor for motion detection. AXIS C1410 Mk II is a standalone unit that can be placed almost anywhere, which supports a flexible, scalable and cost-effective approach to system design.
