

Supply chain insights powered by Axis and SiB Solutions

Intelligent Video and AI Services (IVS) provide logistics-intensive companies with visual facts for quality improvements and cost reductions.

- > Visual and fact-based insights of root causes
- > Claim management
- > Proactive logistics problem solving
- > Improve cost and operation efficiency

Visual insights of supply chains

SiB Solutions provides Intelligent Video and AI Services (IVS) that, combined with Axis Camera Station Video Management Software and cameras from Axis, enables you to turn video and data from your logistics processes into searchable visual insights. This will help to improve operations, cut cost and increase customer satisfaction. It will free-up time to focus on your core business rather than on time-consuming investigations and administration.

Improve operations

The service provides new possibilities for logistics-intensive companies to improve their operations by using searchable video to quickly verify or reject claims, find root causes and to do proactive improvements. In addition, the service can prevent errors in real time with Artificial Intelligence and guide the operator by using augmented reality, light signals and/ or sound.

Increase customer satisfaction

Many customers are tied to Service Level Agreements where disputes need to be resolved by presenting visual evidence. The service enables customers to efficiently search logistics data to get an instant view of related goods handling through time-stamped video clips.

How it works

Axis cameras connected to AXIS Camera Station are used to provide recorded video clips of logistics processes where data from other operative systems such as ERPs, warehouse management systems or similar, are collected and merged with the right video clips.

The collected data must contain the position of the goods handled, timestamps and searchable references such as order-id, item number or pallet-id.

A subscription-based service

For immediate return on investment the solution is offered as a subscription-based service. The monthly subscription fee includes hardware, software, training, support and maintenance. The service is available through a global network of distributors, installers and implementation partners.

Easy deployment

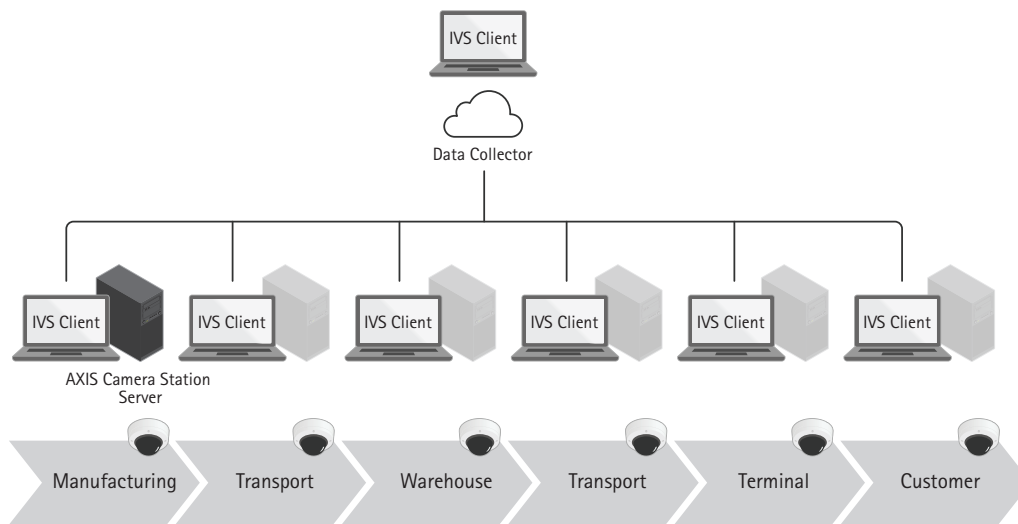

Thanks to the use of already existing system transactions and logs for data collection at the customer site, a small and dedicated project team can do the necessary configurations and quickly get the system up and running.

About SiB Solutions

SiB Solutions is a Swedish logistics technology company enabling flawless logistics across the supply chain world-wide. SiB Solutions is dedicated to revolutionizing the world of logistics one innovation at a time. Typical customers are logistics-intensive companies transacting valuable goods, seeking to optimize logistics. SiB Solution's partner network includes innovative companies around the world.

About AXIS Camera Station

AXIS Camera Station is a generic video management software for wide range of installations. Manufacturing sites, production facilities, retail stores, hotels, schools and others can enjoy full control and protection of their premises and can quickly take care of incidents. All to make businesses run more smoothly. AXIS Camera Station matches Axis network video products and features to offer end-customers a complete, flexible, safe and reliable system.

The number of AXIS Camera Station servers may vary depending on system setup.

Why network video

- > Superior image quality
- > Remote accessibility
- > Easy, future-proof integration
- > Scalability and flexibility
- > Cost-effectiveness
- > Distributed intelligence
- > Proven technology

Why Axis

- > Industry leader in network video
- > Global market presence
- > Strong partner network
- > Smart, innovative products and services for video surveillance, access control, audio systems, and video analytics

Why SiB Solutions

- > Specialized in software and services for visual insights to optimize supply chains
 - > Preferred by international logistic-intensive companies world-wide
 - > Extensive technology and logistics knowledge
 - > Continuous innovations to deliver state-of-the-art solutions
 - > Global reach
 - > Strong partner network
