

Compact and highly robust video intercom

AXIS I8016-LVE Network Video Intercom is a compact and highly robust network intercom designed for two-way communication, video identification, and remote entry control. It offers 5 MP resolution with invisible IR night vision, and exceptional audio volume with echo and noise cancellation to ensure reliable 24/7 identification even in the most demanding situations. It's the ideal product to use in all types of high-security installations such as in prisons and psychiatric wards.

Key benefits of AXIS I8016-LVE Network Video Intercom in correctional facilities:

- > Anti-ligature, vandal-resistant IK10-rated, IP66 and IP69
- > High quality audio with echo and noise cancellation
- > 5 MP resolution and 140°FOV
- > Compatible with 2-gang installation boxes
- > Easy installation with PoE
- > Open interface with IP phone integration, SIP support
