

## Product Discontinuation Statement

This document outlines Axis products that will be discontinued and indicates the relevant replacement products.

The following products are covered by this statement:

Discontinued Product	Replacement Product
AXIS AUDIO MANAGER DEVICE PACK 10 [01519-021]	None needed due to removal of license restriction
AXIS AUDIO MANAGER DEVICE PACK 100 [01519-041]	None needed due to removal of license restriction

As of version 3.3 of AXIS Audio Manager (C7050), the device license restriction is removed and replaced by an application license that is included in the purchase of the C7050. Existing C7050 servers will be automatically upgraded when v3.3 is installed. After upgrade to v3.3 it will be possible to install more than 300 devices without any additional license – there is no fix limit. There is therefore no need for the additional license articles listed above.

To avoid that any customer accidentally purchasing licenses that will be for-free after upgrade to v3.3 we will immediately remove the license from the price lists. Please contact the Audio team through Technical support if licenses are needed for an older version and for some reason an upgrade to v3.3 is not possible.
