

AXIS C1004-E Network Cabinet Speaker

Audio made smart and easy

AXIS C1004-E allows users to remotely warn off intruders before they commit a crime, to deliver instructions during an emergency or to make general voice messages. Built-in memory supports pre-recorded messages. Security staff can respond to notifications with live speak. Digital signal processing (DSP) ensures clear sound. Open standards support easy integration with network video, access control, analytics, and VoIP (supporting SIP). AXIS C1004-E is a standalone unit that can be placed almost anywhere, which supports a flexible, scalable and cost-effective system. The speaker can be installed indoors or on sheltered exterior of buildings. It can be mounted horizontally or vertically.

- > All-in-one speaker system
- > Connects to standard IT network
- > Simple installation with PoE
- > Remote health testing
- > SD card for audio content storage

Audio management	Software applications for managing and controlling your audio system regardless of its size and complexity: - Included in the product (runs inside the device) is AXIS Audio Manager Edge, offering zone management, content management, content scheduling and health monitoring. Up to 200 speakers and 20 zones are supported (see separate datasheet for more details). - For larger and more advanced systems we recommend AXIS Audio Manager Pro (see separate datasheet).
