

AXIS Optimizer for Milestone XProtect®

Unlock great user experiences and Axis features directly in XProtect.

AXIS Optimizer for Milestone XProtect is a suite of plugins and features that optimize the usability of Axis cameras in XProtect. This optimizes running XProtect with Axis devices and ensures users access Axis innovation. It is regularly updated with new functionality and always available as a free download at:

www.axis.com/products/axis-optimizer-for-milestone-xprotect/

It provides different plug-ins and features for Axis devices in XProtect® software. It automates plugin management and optimizes running XProtect with Axis devices.

AXIS Optimizer for Milestone XProtect provides one time installation for all relevant, required plugins for Axis devices on your network. It unlocks all the features and capabilities in both Axis devices and XProtect, bringing value to system integrators, administrators and operators. It automatically manages the plugin version discovery to configuration process – ensuring you optimally deploy and constantly make available the latest features in all Axis devices connected to XProtect.

Why use AXIS Optimizer for Milestone XProtect

- > Enjoy optimal experience running Axis devices in Milestone XProtect
- > Simplest way to ensure you deliver Axis innovation as it is intended to operate to Milestone users
- > Save considerable time and effort finding, downloading, installing and configuring all relevant plugins for Axis devices in XProtect – auto-discovery and – update minimizes need for future plugin maintenance

Plugins included

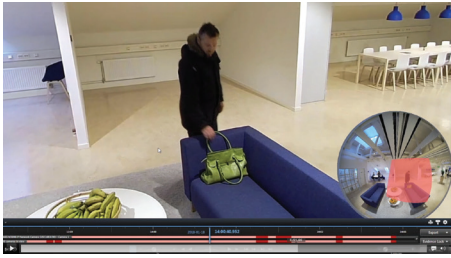

The following plugins and integrations are included:

- > **Dewarping:** smooth 360° dewarping of client-side live and recorded video ensures view using Axis cameras
- > **Radar:** configure and manage your Axis radar detectors, exclusion zones, etc.
