

AXIS A4030-E Reader

Secure RFID reader with compact mullion design

This OSDP reader supports most types of smart RFID card standards with 13.56 MHz, offering secure and seamless touch-free entry. Its modern mullion-mount design fits perfectly in narrow spaces. It's OSDP Secure Profile verified for strong interoperability with Axis and third-party access control systems that support OSDP. It can also be remotely managed by Axis door controllers, allowing you to access new features, configure the device, and apply security updates from anywhere. An EAL6+ Certified Secure Element offers added protection. Furthermore, transparent mode provides secure end-to-end encryption by storing the encryption key on the door controller rather than on the reader.

- > **Perfectly matches Axis door controllers and credentials**
- > **IP65, IK07 ratings for use in harsh environments**
- > **EAL6+ Certified Secure Element and transparent mode**
- > **OSDP secure profile verified for great interoperability**
