AXIS Optimizer for Siemens Siveillance™ Video
Optimizes performance of Axis and Siemens systems

AXIS Optimizer is an application that optimizes the performance of Axis devices in Siemens Siveillance™ Video. It unlocks great user experiences and Axis features directly in Siemens Siveillance™ Video by ensuring that administrators and operators have access to a multitude of capabilities running Axis and Siemens. It saves users time and effort by streamlining access to device settings, dewarping, response to real-time events, automated actions on Axis devices, forensic search, security controls, and integration of body worn cameras and evidence.

> **Provides optimal experiences using Axis and Siemens systems**

> **Optimizes workflow for administrators, operators, and investigators**

> **Save time and effort managing integrations and configuring Axis devices**

> **Designed and validated to work optimally in Siemens Siveillance™ Video**

> **Regularly updated, always available for free**

AXIS Optimizer for Siemens Siveillance™ Video

System features

Supported devices	Axis network products: Network cameras Network audio Network intercoms System devices Wearables Analytics
Access device settings	Access a device's interface directly in the VMS Easy update and configuration of device applications
Perform automation	Create extended actions for Axis devices Centrally manage license plate lists
Respond to live events	Access Axis cameras' specific features directly from live view Interact through speakers: Push to talk and trigger audio clips from live view and alarm view, to groups of Axis speakers Receive and handle calls from Axis door stations and intercoms
Forensic search	Use advanced filtering to search based on object classification Use advanced filtering to search for vehicles and license plates using metadata from edge analytics Use advanced filtering to search for containers using metadata from edge analytics
Video dewarping	Integrated video dewarping for live view and playback Optimized for Axis fisheye cameras and multisensor and panoramic cameras Several customizable view options: Quad, Normal, Normal with overview or Panorama
Security controls	Customizable role permissions for AXIS Optimizer features Customize which Axis device features an operator has access to (onscreen controls) Manage devices from multiple sites in AXIS Device Manager Extend.
Body worn integration	Simple set up of Axis body worn camera integration with Siemens Siveillance™ Video for administrators Securely capture, transfer, store, view, export and share video evidence

System requirements

Supported platforms	Siemens Siveillance™ Video Pro Siemens Siveillance™ Video Advanced Siemens Siveillance™ Video Core Plus Siemens Siveillance™ Video Core
Supported platform versions	Always verified and tested with latest platform versions Always backwards compatible with older versions

Installation and maintenance

Install	One installer for all integrations [a] Easy and simple setup with no major configuration Free of charge
Upgrade	Regularly updated with new functionality and support for Axis devices Automatic upgrade of applications on client machines Upgrade support for offline systems Monitor client and server versions

Cybersecurity

Documentation	AXIS Hardening Guide AXIS Vulnerability Management Policy AXIS Security Development Model To download documents, go to *axis.com/support/product-security* To read more about Axis cybersecurity support, go to *axis.com/cybersecurity*

General

Federated systems	Full support for federated systems
Interconnected systems	Full support for interconnected systems
Languages	Video Client in English, Spanish, German, French, Italian
Support	Everything related to AXIS Optimizer is fully supported by Axis Designed and validated to work optimally with Siemens Siveillance™ Video

a. *AXIS Optimizer Body Worn Extension is available as a stand-alone service*
