AXIS P3245-LVE-3 License Plate Verifier Kit
Easy, cost-effective vehicle access control

AXIS P3245-LVE-3 includes an HDTV 1080p fixed dome camera and comes with AXIS License Plate Verifier preinstalled. This easy-to-install kit verifies license plates against a list of authorized or unauthorized number plates stored in the camera. Processing and storage take place in the camera, so there's no need for expensive servers, and bandwidth requirements are reduced. This vandal-resistant camera includes shock detection, so it's safe to use even when installed at lower, more accessible heights. And Axis OptimizedIR ensures the ideal image settings for license plate reading 24/7. Furthermore, it offers integration with video management systems (VMS) for complex requirements.

> **All-in-one vehicle access control**

> **Support for allow- and blocklist**

> **Vandal- and weather-resistant**

> **Built-in support for Axis Network Door Controllers**

> **OptimizedIR for recognition in darkness**

Scenarios

Typical applications	**Efficient vehicle access control** Efficiently automates the entry and exit procedures for authorized vehicles at depots, service centers, lots, priority lanes, parking facilities, and various other locations. Validates license plates against allowlists or blocklists for efficient, seamless access control. Supports up to 10,000 license plates in each list. **Adding more functionality** Integrate with Axis network door controllers for increased options and functionality. Axis network door controllers, in conjunction with AXIS Camera Station Secure Entry, support more advanced access rules, schedules, and detailed event logs. Compatible with various partner software, offering diverse credential options and tailored features to meet specific needs. **License plate recognition in slow traffic** In slow traffic, the application can detect and read license plates in traffic at up to 30 km/h (19 mph) on access roads, in city centers and enclosed areas such as campuses, ports or airports. This allows for LPR-forensic search and LPR-triggered events in a VMS such as AXIS Camera Station.

System integration

Application Programming Interface	Open API for software integration.
Event streaming	Integrates with camera event management system to enable event streaming to management software and camera actions such as I/O control, notification, and edge storage.
