

AXIS Indoor Recessed Enclosure

For AXIS 214 PTZ camera

- > Indoor installation
- > Attractive recessed ceiling dome
- > Tinted lower dome to hide the direction of the camera
- > Tailor-made for AXIS 214 PTZ camera

AXIS Indoor Recessed Enclosure is a drop-ceiling housing for indoor installation of AXIS 214 PTZ camera. It is an ideal solution for public environments that need discreet surveillance.

The visible part of the housing extends only 3.5 in below the ceiling, giving the housing a low-profile look. The lower dome is a semi-sphere that is constructed of distortion free, cell-cast acrylic for best image quality. The smoked lower dome hides the direction of the camera for added discretion. A white powder coat trim gives the housing a clean, professional look.

For quick and easy installation, the housing is shipped with a cardboard template for cutting a proper size opening for the enclosure in a drop ceiling. Two anchor points on the metal housing enable the unit to be secured to the superstructure.
