

**NEW**

AXIS P3245-VE/-LVE  
outdoor mounting bracket

**OLD**

AXIS P3225-VE/-LVE MkII  
outdoor mounting bracket

### Purpose of bracket modifications:

- > To support both horizontally and vertically mounted double gang boxes as well as more Axis accessories, four new holes were added.
- > To preserve robustness, two holes were removed and 12 holes were made slightly smaller.
- > To simplify the installation, four mounting screws were replaced by two clips.
- > Together with the AXIS Conduit Adapters, all new AXIS P32 and AXIS M32 cameras support both 1/2" (M20) and 3/4" (M25) conduits.
- > To synchronize indoor and outdoor accessories, screw pillars and towers were moved to the same positions as the indoor bracket. The brackets of all new AXIS P32 (indoor and outdoor) and AXIS M32 cameras now have the same footprint.
