

## AXIS Device Manager Extend

**Stay aware and in control.  
Everywhere.**

Remote device management for multisite installations.

# Simplify device maintenance and reduce costs

## Firmware management

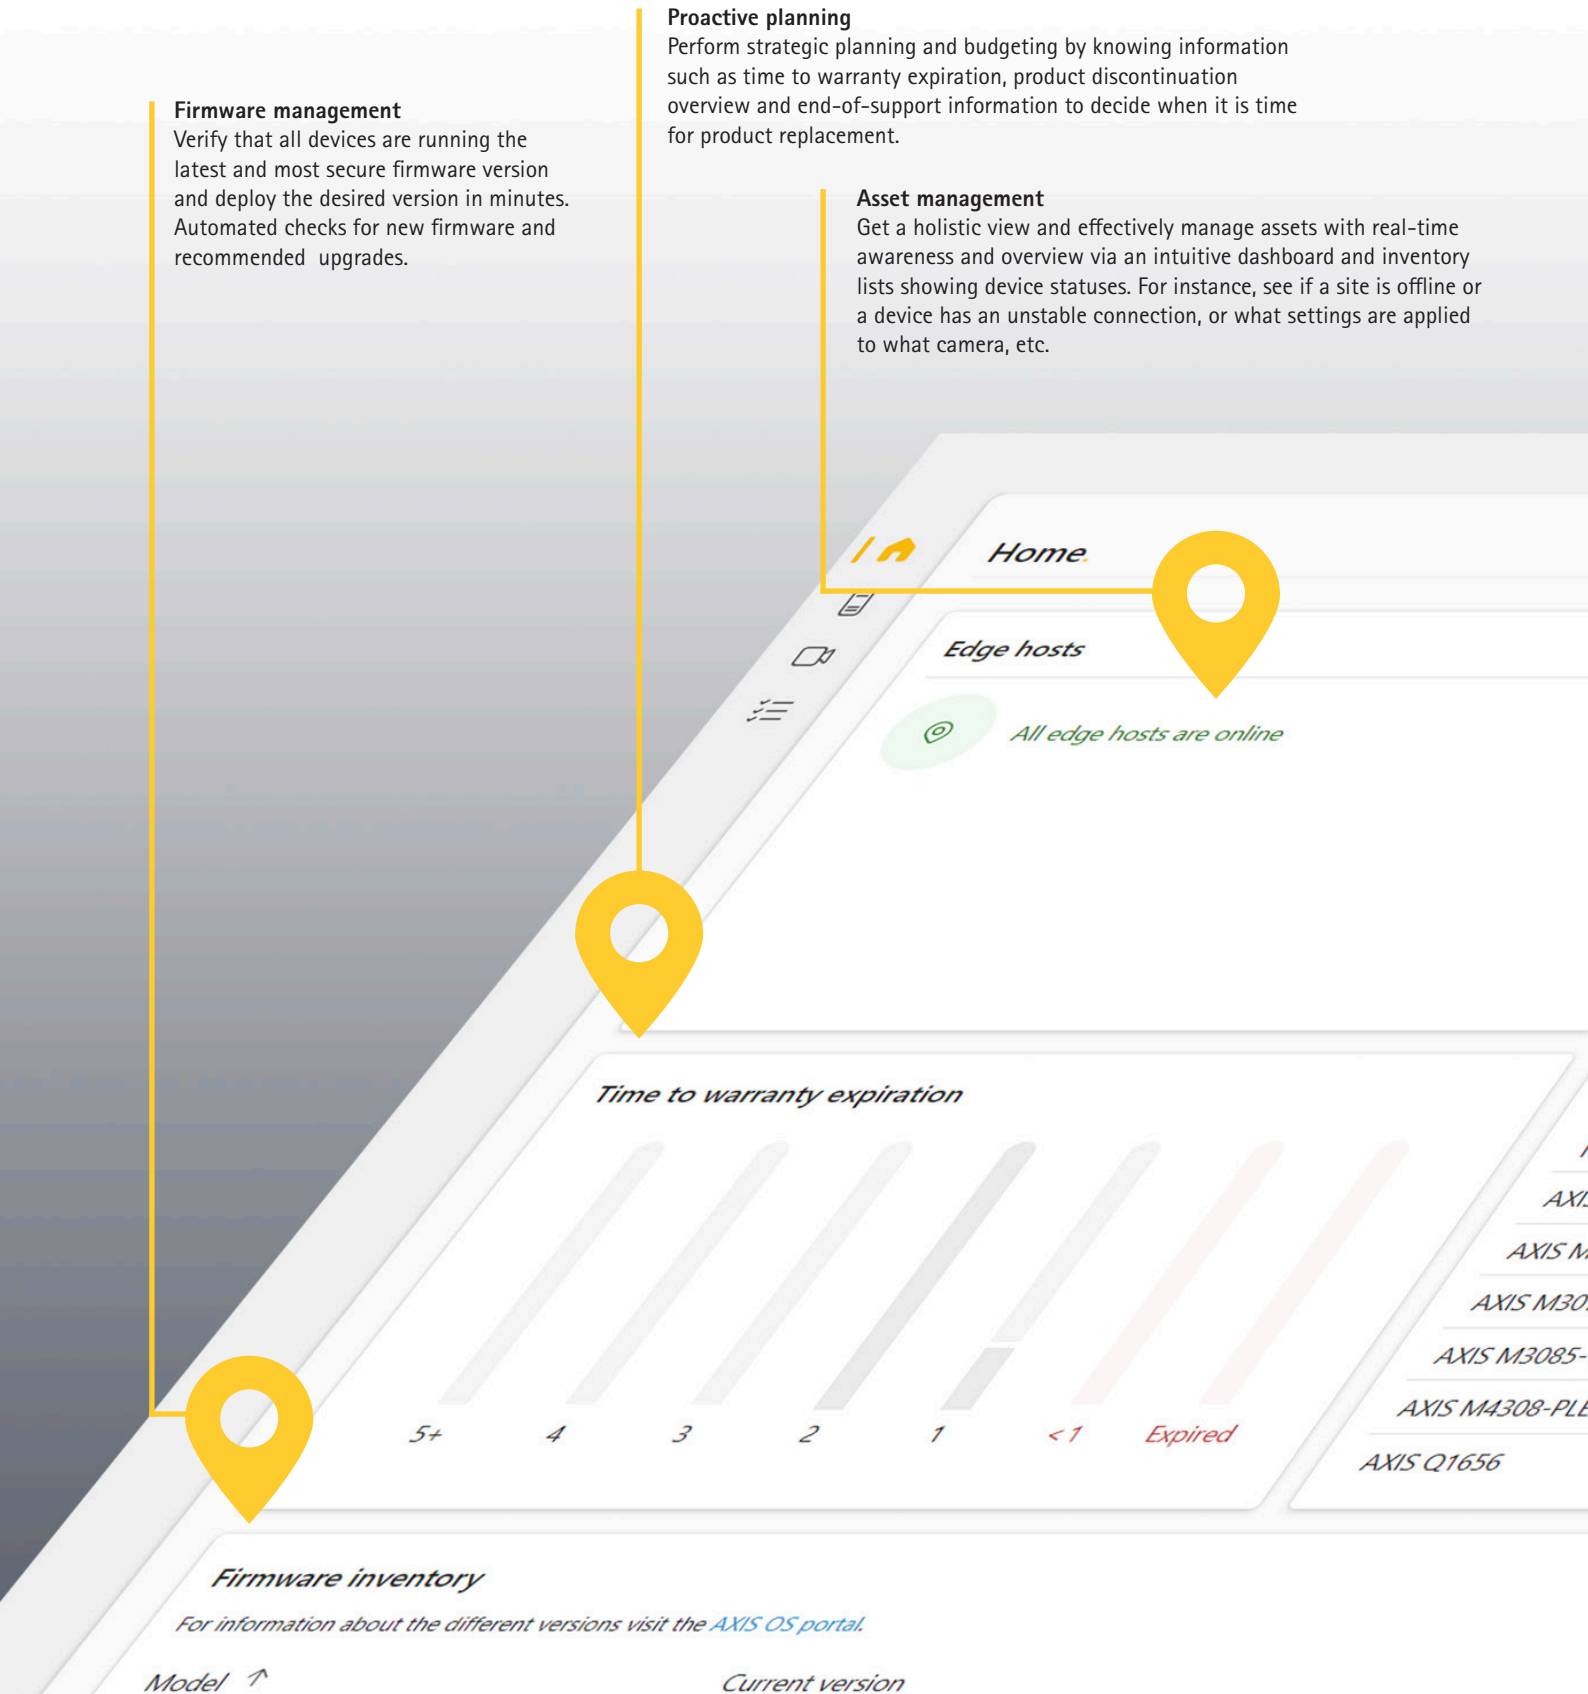

Verify that all devices are running the latest and most secure firmware version and deploy the desired version in minutes. Automated checks for new firmware and recommended upgrades.

## Proactive planning

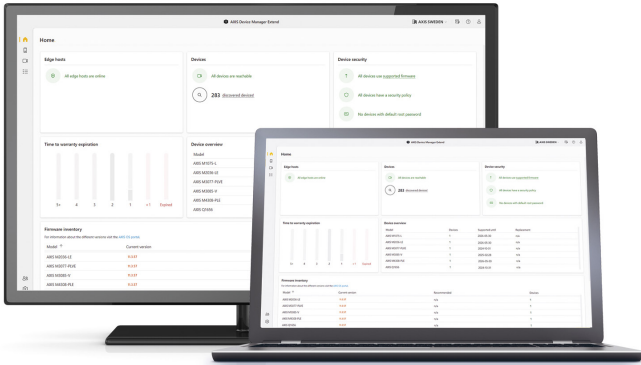

Perform strategic planning and budgeting by knowing information such as time to warranty expiration, product discontinuation overview and end-of-support information to decide when it is time for product replacement.

## Asset management

Get a holistic view and effectively manage assets with real-time awareness and overview via an intuitive dashboard and inventory lists showing device statuses. For instance, see if a site is offline or a device has an unstable connection, or what settings are applied to what camera, etc.

AXIS Device Manager Extend offers a unified, user-friendly interface that helps you proactively manage Axis devices and sites. Featuring an intuitive dashboard and remote site access, you can manage thousands of Axis devices and it allows you to perform maintenance tasks at scale, helping you save time and money.

Application management

View app inventory for what applications and versions are running and apply new. You can start hundreds of applications at once. There is policy support for AXIS Video Motion Detection, AXIS Motion Guard, AXIS Fence Guard, and AXIS Loitering Guard. This means you can schedule and automatically install, update, and reinstall the supported applications whenever suitable.

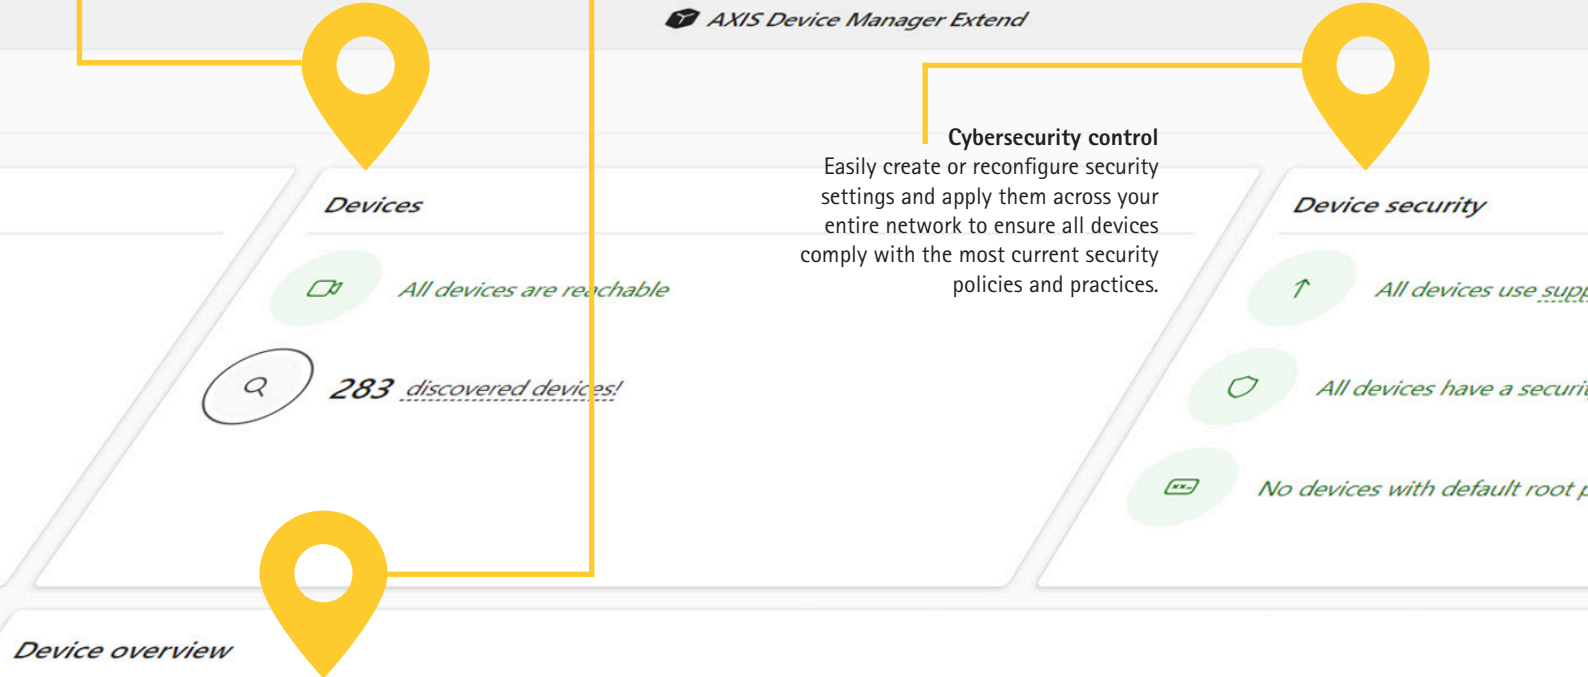

Secure remote access

Provides a convenient and secure way to access your sites remotely, which is needed for firmware management and set security policies, for instance. Plus, it is sustainable since you don't need to go on site to identify potential issues.

AXIS Device Manager Extend

Cybersecurity control

Easily create or reconfigure security settings and apply them across your entire network to ensure all devices comply with the most current security policies and practices.
