AXIS Body Worn Live

Right there with you

AXIS Body Worn Live streams live video, audio and metadata from Axis body worn cameras. Let Axis host it for you or host it yourself if cloud-based hosting isn't an option for your organization. It is secure and reliable, it supports informed decision making by operators and provides an added sense of safety for the camera wearers. AXIS Body Worn Live has several layers of security, and the transmission is protected by full end-to-end encryption, ensuring that the customer owns their encryption keys. Being a web-based application it's compatible with PCs, tablets and Android mobile devices and with the self-hosted option it is integrated directly in your preferred VMS.

> **Hosted by Axis or hosted by you**
> **Video, audio, and metadata in real-time**
> **Data retention for instant playback**
> **End-to-end encryption**
> **Independent of VMS or EMS**

AXIS Body Worn Live

General

Variants
Axis-hosted
Self-hosted

Supported devices
AXIS W102 Body Worn Camera, AXIS W110 Body Worn Camera, AXIS W120 Body Worn Camera

Evidence data storage locations: Australia, Canada, EU, France, Germany, India, Japan, Switzerland, United Kingdom, United States (East, West)

Compliance
CJIS-compliant data transfer
Axis-hosted:
CJIS-compliant storage
Data servers supporting regional regulatory requirements for personal integrity

Administration
Centralized user and access management
Axis-hosted:
Multifactor authentication through My Axis

Data streaming
Video, audio, location

Languages
English
Axis-hosted:
German, French, Spanish, Italian, Russian, Simplified Chinese, Japanese, Korean, Portuguese, Polish, Traditional Chinese, Dutch, Czech, Swedish, Finnish, Turkish, Thai, Vietnamese, Romanian, Arabic, Farsi, Hebrew

Cybersecurity

Security
Axis-hosted:
End-to-end encryption: XChaCha20-Poly1305, X25519 and XSalsa20
Encryption at rest: AES-256 bit
Encryption in transit: TLSv1.2 or later with 256 bit ciphers
Self-hosted:
Encryption in transit: TLSv1.2 or later, dTLS 1.0 or later, SRTP

Video

Video compression
H.264 (MPEG-4 Part 10/AVC) Baseline, Main and High Profiles
640x360 @ 25/30 fps
Bandwidth requirements: up to 8 Mbit/s

Resolution
1280x720 to 640x360

Frame rate
25/30 fps with power line frequency 50/60 Hz

Audio

Audio encoding
AAC
Self-hosted:
Opus

Capabilities

Functionality
Axis-hosted:
Live stream triggers: Camera button
Stream gap retrieval
Priority upload of latest data
Pre-buffer
Multiple clients can view the same stream
Acknowledge stream
Self-hosted:
Depends on VMS integration

Recording playback
Axis-hosted:
Access to recent streams for 24 hours
Multiple simultaneous streams
Time line scrubbing in live stream
Go to live
Audio mute
Self-hosted:
Depends on VMS integration

Positioning system
Axis-hosted:
Location data through GNSS
