

# AXIS Device Manager Extend

Stay aware and in control. Everywhere.

AXIS Device Manager Extend is a software application which provides a user-friendly interface for discovering, monitoring and operating of Axis devices on your organization's networks. It's an extension of our popular device management tool, ideally suited for multisite environments. It delivers a unified view of your inventory and 100% situational awareness and control of all Axis devices on all sites. Stay ahead and aware of performance risks to your devices, such as connectivity failures or devices with default root password. AXIS Device Manager Extend lets users gain awareness, maintain proactive planning and monitor connectivity through the entire device lifecycle

- > **Efficiently monitor all devices on all sites remotely**
- > **Real time awareness through a dashboard view of device statuses**
- > **View warranty and product discontinuation information**
- > **Export information to create reports**
- > **Proactively plan device replacements**

# AXIS Device Manager Extend
