

# AXIS Optimizer for Milestone XProtect<sup>®</sup>

## Optimizes performance of Axis and Milestone systems

AXIS Optimizer is an application that optimizes the performance of Axis devices in Milestone XProtect. It unlocks great user experiences and Axis features directly in Milestone XProtect by ensuring that administrators and operators have access to a multitude of capabilities running Axis and Milestone. It saves users time and effort by streamlining access to device settings, dewarping, response to real-time events, automated actions on Axis devices, forensic search, security controls and integration of body worn cameras and evidence.

- > Provides optimal experiences using Axis and Milestone systems
- > Optimizes workflow for administrators, operators and investigators
- > Save time and effort managing integrations and configuring Axis devices
- > Designed and validated to work optimally in Milestone
- > Regularly updated, always available for free

# AXIS Optimizer for Milestone XProtect®

System features		System requirements
