

# Welcome to Axis!

The world leader in network video  
Irving, Texas

# About Axis

Axis Communications was formally founded 1984 by Mikael Karlsson, Martin Gren and Keith Bloodworth. The year before, Martin Gren and Mikael Karlsson founded the company Gren & Karlsson Firmware. With Mikael's knowledge and understanding of International Business, Martin's technical expertise and Keith's skills in sales models they formed a complementary and dynamic combination. By the end of the 1980s Axis had established a position as one of the three world leaders in protocol converters/printer interfaces.

With the emergence of new technologies and the growing importance of network accessibility, Axis broadened its connectivity scope to include solutions for network printing and document management in wired and wireless environments. In response to the convergence towards IP-based systems, Axis also focused increasingly on applications for video surveillance, remote monitoring, and web broadcasting, and introduced the world's first network camera in 1996.

While Axis has come a long way since then, one thing hasn't changed – Axis' dedication to serving the market with a consistent succession of winning network video solutions that expand the users' potential. Today, Axis is the world leader in network video, focusing on a new wave of innovation, making advances in light sensitivity, dynamics, color reproduction and resolution in its network cameras. Beyond that, Axis is also successfully moving into new markets that Axis is calling the Internet of Things, such as access control, network horn speakers and IP Video Doorstations. Driven by the vision to come up with new, innovative, smart solutions that meet user needs, Axis will expand its portfolio to keep achieving that.
