

Scale high-density modular security systems

From events to actions

- > Supports up to 128 I/Os and 64 relays with one IP connection
- > Connect sensors, relays, and devices
- > Turn security events into physical responses
- > Designed for use with Axis network I/O modules and door controllers

Security applications

Monitoring

- > Trigger sirens and strobes
- > Real-time alarm activation
- > Connected to motion detection sensors
- > Door position sensor for external alarm

High-density installations

- > Featuring 16 Form C relays, 16 supervised inputs and outputs
- > Seamless integration with Axis network I/O modules and door controllers
- > Scale systems without adding network complexity

Alarm system integration

- > Relay output to control or trigger alarm system, combined with AXIS A9210
- > Connected with panic button for emergency control
- > Connect legacy alarms

Access control applications

Door and lock control

- > Support electric locks including magnetic lock
- > Scheduled lock management

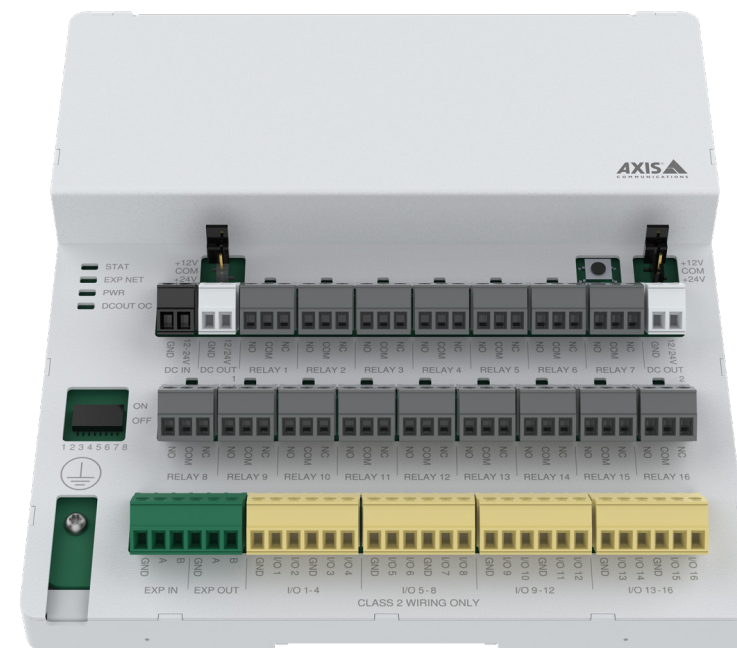

Automation and efficiency

- > Scheduled door unlocking
- > Night lockdown
- > Enable smarter workflows

Elevator access control

- > Floor access control and tracking
- > Secure floor access
- > Scale up to 64 floors

Extends security and access control for Axis and third-party systems

- > Open integration
- > Event-driven action
- > Scalable architectures
- > Fully integrated within Axis end-to-end solutions
