

# AXIS Device Manager Extend

Scalable device management from anywhere

AXIS Device Manager Extend offers a unified, user-friendly interface helping you proactively manage Axis devices on your organization's networks. It's ideally suited for multisite environments and device lifecycle management. Featuring an intuitive dashboard and remote access, you can maintain thousands of Axis devices and perform bulk device software upgrades and other tasks at scale. It's an invaluable tool for troubleshooting and proactive planning, helping you save time and money. AXIS Device Manager Extend lets users gain awareness and ensure cybersecurity control of all Axis devices on all sites through the entire device lifecycle.

- > Remotely manage your Axis devices on all sites
- > Verify device software version and push out upgrades in minutes
- > Easy troubleshooting through a dashboard view of device status
- > View warranty and product discontinuation information
- > Proactively plan device replacements

# AXIS Device Manager Extend
