

## AXIS P1445-LE-3 License Plate Verifier Kit

Easy, cost-effective kit for vehicle access

AXIS P1445-LE-3 License Plate Verifier Kit consists of AXIS P1445-LE Network Camera and pre-installed AXIS License Plate Verifier analytics, making it an easy, cost-effective kit for automated vehicle entry and exit management. With edge storage and I/O ports, AXIS P1445-LE-3 uses allow and block lists to accurately verify access to controlled areas such as parking lots. Furthermore, built-in support for AXIS A1001 Network Door Controller makes it possible to expand the system and an open API allows for integration with third-party software. AXIS P1445-LE-3 features OptimizedIR, impact resistance and a wide temperature range for installation in any environment.

- > Cost-effective standalone system
- > Single lane detection up to 30 km/h (19 mph)
- > Allow and block lists for license plate verification
- > Day and night with OptimizedIR
- > Built-in support for Axis door controller and Axis I/O relay modules

## **AXIS License Plate Verifier**

| Application                             |   |
|---|---|
| Compute<br>platform                     | Edge  |
| Licenses                                | AXIS License Plate Verifier license included.   |
| Configuration                           | Web configuration included  |
| Settings                                | Define area of interest in scene.<br>Allow- and blocklist logic.<br>Barrier mode: Open to all, open to allowlisted, open to all but<br>blocklisted.<br>Minimum width: 130 pixels for one-row license plates; 70 pixels<br>for two-row license plates.<br>FIFO event log entries including thumbnail image of license plate.<br>Up to 1000 entries on camera storage. Up to 100 000 entries<br>onAXIS Surveillance Cards.<br>Configurable retention time of stored events  |
| Detection range                         | 2.0 to 7.0 m (6.6 to 23 ft)   |
| Vehicle speed                           | Up to 30 km/h (19 mph)  |
| Detection time                          | Less than 1 second.   |
| Scenarios                               |   |
| Typical<br>applications                 | Vehicle access control<br>In Access control, the application monitors entrances and<br>exits of gated areas such as parking areas. The application<br>verifies detected license plates against an allowlist or a<br>blocklist for granting or denying access to an area. Maximum<br>10,000 license plates in each list.<br>For a scenario where greater functionality and flexibility<br>are required, use AXIS A1001 Network Door Controller.<br>AXIS A1001 with AXIS Entry Manager software supports access<br>rules including schedules and a more detailed event log. Multiple<br>partner software that support a great number of credentials and<br>features are available.<br>License plate recognition in slow speed traffic<br>In Freeflow, the application can detect and read license plates<br>in slow speed traffic on larger access roads, city centers and<br>enclosed areas like campuses, ports or airports. This allows for<br>LPR-forensic search and LPR triggered events in a VMS such as<br>ACS. |
| System integra                          | tion  |
| Application<br>Programming<br>Interface | Open API for software integration.  |
| Event streaming                         | Integrates with camera event management system to enable<br>event streaming to management software and camera actions<br>such as I/O control, notification, and edge storage.   |
| Supported devices                       | Direct integration with AXIS A1001 Network Door Controller and AXIS A91 Network I/O Relay Modules.  |
| General                                 |   |
| Supported countries                     | For a complete list of supported countries, go to the product page at <i>axis.com</i>   |
