

AXIS Site Designer

Faster from draft to done.

AXIS Site Designer

Multiply your design potential

The background features two diagonal stripes running from the bottom-left to the top-right. The upper stripe is a light gray color, and the lower stripe is a bright yellow color. The stripes are separated by a thin white line.

AXIS Site Designer is an empowering leap forward in the design of surveillance systems. This intuitive tool simplifies and streamlines your design and quotation workflow, making projects faster and easier to create, revise or implement. It lets you efficiently manage any project—whether you need to create a system with thousands of Axis devices connected to it or just a few.

Any project

Any size site. Just a few to thousands of devices.
One or multiple locations.

Anytime, anywhere

Get work done at the customer's site.
At your office. And on the road.

Multiple vendors

Create an end-to-end solution with Axis VMS or
third party VMS and other products.

Evergreen groceries

AXIS

AXIS P3375-LVE
Covering parking lot entrance
Plays on lighting with red for the parking lot entrance. Flares out when camera field of view has been large for the surge protection.

Temp 22°
Humid 12%

Accessories

AXIS P3375-LVE

Design

Recommend products and verify requirements in an intuitive map view – accurately and quickly.

Quotation

Generate a professional quotation – or change items in your bill of materials – in minutes.

Installation

Import camera and recording settings into your VMS and share notes with installers in seconds.

**Key steps
from draft
to done.**

1.

Create a new project, or reuse and adapt an existing one. Save your project online or offline.

.....

2.

Place cameras and devices directly in a floorplan or map to view camera coverage.

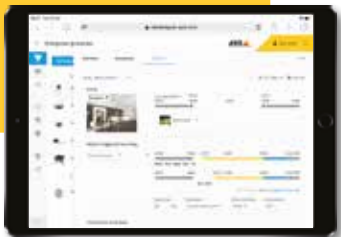

3.

Intuitively select
cameras, devices,
mounts and accessories
– with no guesswork.

4.

Choose recording appliances with your preferred VMS from Axis or third parties.

5.

Generate a detailed quote and bill of materials in minutes – and update quickly for faster turn-around to the customer.

6.

Share all documentation including notes with installers — push configurations to AXIS Camera Station VMS directly.

Always available, always free
