Why academy?

Education and skill-building
are powerful tools

The surveillance industry is constantly changing as new use cases and technologies arise. Remaining at the forefront of these developments can be challenging. Creating a team of experts requires continuous investment and a commitment to training. But it always pays off. Customers expect your representatives to possess deep and thorough knowledge – not just of products, but also of surveillance solutions and technologies, as well as of industry trends and sector-specific challenges. So they can be confident they get the best solution possible.

What's in it **for you?**

Build competencies and put new skills into practice

Axis Communications Academy offers tangible benefits for everyone: Individuals gain the deep technical understanding and know-how they need to present themselves as experts. They also strengthen their practical skills – and boost their confidence. Companies remain at the forefront of a rapidly changing industry and can show customers they're in good hands. Customers will feel confident they have a competent advisor. They'll get effective, well-designed, scalable solutions and efficient installations that take full advantage of the unique benefits Axis offers.

Improve performance, maximize opportunity, and stay on the cutting-edge!

What do you need to know?

You need a thorough understanding of surveillance solutions and technologies to provide the best possible solutions for your customers. Keeping up-to-date on the latest knowledge on Axis solutions, on technology, industry trends, and sector-specific issues lets you provide your customers with expert competence. Find the knowledge you're looking for about Axis solutions and technology as well as industry trends and opportunities.

Learning portal

This is the gateway to all the learning resources the Academy offers for building your expertise. Choose the knowledge area you're interested in.

LEARNING-PORTAL](http://WWW.AXIS.COM/LEARNING/ACADEMY/LEARNING-PORTAL)

Knowledge areas

- Network video**
Design, implement, and install network video surveillance systems.
- Network audio**
Design network audio systems and learn about properties that affect audio quality.
- Analytics**
The wide range of flexible and scalable Axis analytics – when and how to use them.
- End-to-end solutions**
A system tailored to your needs, using perfectly matched components, all from Axis.
- Access control**
How to use an access control system, and how to design and configure it.

- Cybersecurity**
Principles of risk management and system hardening, encryption, and secure network communication.
- System devices**
Enhance and expand intelligent network systems with devices such as radars and encoders.
- Wearables**
Axis open-platform body worn solutions – components and available accessories.
- Network intercoms**
The capabilities of network intercoms, plus how to pinpoint powerful use cases for secure access control.

What would you like to learn more about?

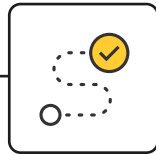

Depending on your company and your role, you most likely work with a specific subset of tasks. To ensure an optimal learning experience for you, we've put together different learning tracks. A learning track consists of material in different formats, tailored to your specific role. You start with basic, easily accessible courses. Later, you move on to deeper, more practical learning with instructor-led training.

Learning portal

This is the gateway to all the learning resources the Academy offers for building your expertise. Choose the learning track that best suits you.

LEARNING-PORTAL](http://WWW.AXIS.COM/LEARNING/ACADEMY/LEARNING-PORTAL)

Learning tracks

Sales and business

Learn how to choose the most efficient solution for your customers.

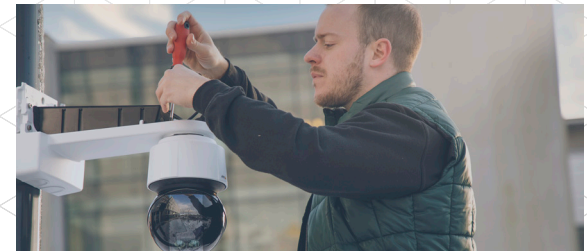

System design

Learn how to create better solutions and experiences for your customers.

Installation and configuration

Learn about installing video, audio and access control systems and how to optimize settings.

A variety of learning formats to suit your needs

Whether you're looking for accessible, self-paced learning on-the-go, or a deeper dive with hands-on training, we offer a full spectrum of training services. Choose from a range of formats – in-person or online – to suit your learning style, preferences, and needs. To meet those needs, we make an active effort to stay up-to-date on the latest learning trends. And we can also set up private, customized training by one of our expert trainers to accommodate specific requirements.

Axis Certification Program

There's training, and then there's certification. The Axis Certification Program gives you a true competitive advantage. For individuals, it signals deep knowledge about Axis products and the latest network video technology. It's also a source of personal regard from peers and a qualification for potential employees and customers. Companies benefit from added credibility and a unique differentiator in a competitive market. And we use third-party test centers with independent, unbiased proctors, so customers can rest assured that every Axis Certified Professional has mastered network video.

VALIDATE YOUR NETWORK VIDEO KNOWLEDGE!
