

AXIS Body Worn for XProtect

Seamlessly connect Axis body worn cameras with XProtect

- > Stream live video
- > Complete solution with hardware and software
- > Self-hosted with no hidden costs
- > Support for Axis body worn portfolio
- > End-to-end encryption

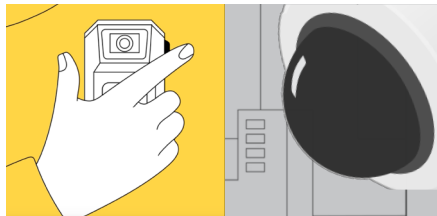

Stream live video and collect evidence from Axis body worn cameras in XProtect with this complete self-hosted solution. Fully integrated into XProtect, it ensures all hardware and software work together seamlessly.

Stream live video

- > In-field users live-stream to desk teams for faster incident management
- > On-premises deployment
- > No extra data processing agreements
- > Trigger alarms and automated actions via the XProtect rules engine

Connected in XProtect

- > Connect body worn and fixed camera footage in XProtect
- > Trigger operator alarms and event-to-actions via the XProtect rules engine

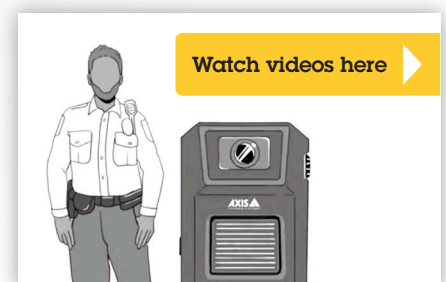

Document the evidence

- > Store, view, replay, and export all video and data, and share evidence or reports
- > End-to-end encryption
- > Support for official FBI standards
- > Built-in privacy and GDPR compliance

This solution integrates with:

- > AXIS W120, AXIS W110, and AXIS W102 Body Worn Cameras
- > AXIS W800 System Controller
- > AXIS W700 Mk II Docking Station (1 bay) or AXIS W701 Mk II Docking Station (8 bay)
- > AXIS Body Worn Live Self-hosted Server (device and application)
- > AXIS Optimizer Body Worn Extension application plugin
- > Wearables accessories
