To: Whom It May Concern

Axis Communications is pleased to affirm that our entire product portfolio, which includes solutions marketed to the US government, Department of Defense (DoD) and associated contractors and affiliates, is fully compliant with Section 889 of the John S. McCain National Defense Authorization Act (NDAA) for Fiscal Year 2019.

NDAA Section 889 prohibits federal agencies, their contractors and grant or loan recipients from procuring or using 'telecommunications and video surveillance services or equipment' including certain components or critical technology from several outlined Chinese manufacturers.

Axis Communications does not employ any SoC (System on Chip), or other components capable of processing software, from the banned Chinese companies. All Axis products use NDAA-compliant chipsets, most products use the in-house developed ARTPEC® chips which are only available to Axis.

For more information, please contact government@axis.com.
