Note: If the camera is in Silent Mode or muted while being docked, the camera will revert to normal settings the next time it is removed from the dock.

Docking

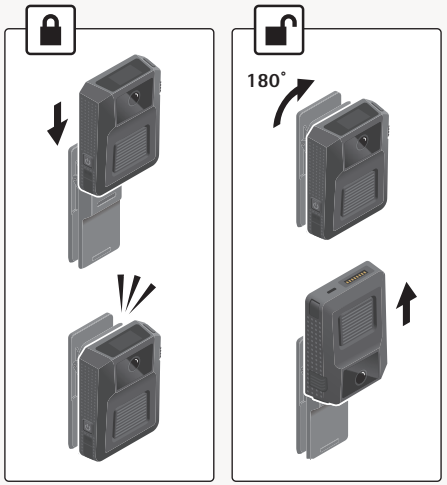

AXIS W102 and AXIS W120 Body Worn Cameras do not need to be powered on or off – taking the camera in and out of the dock power cycles the unit. While docked, the camera will charge, offload video, and install any updates made in AXIS Body Worn Manager.

Mounting accessory use

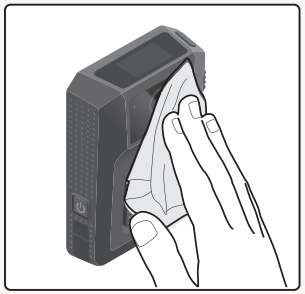

To attach AXIS W102 or AXIS W120 Body Worn Cameras to a mount accessory, slide it straight down and into the slot. To remove, rotate 180* and pull up.

Visit www.axis.com/products/accessories-for-body-worn to explore all available mounting accessories.

Cleaning

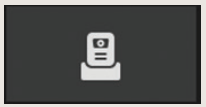

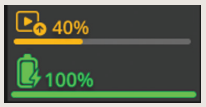

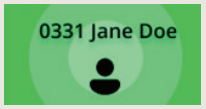

AXIS W102 and AXIS W120 Body Worn Cameras can be cleaned using non-abrasive, solvent-free neutral soap or detergent with water. They can be disinfected using up to 50% isopropyl alcohol. Ensure the unit is dry before placing in dock.

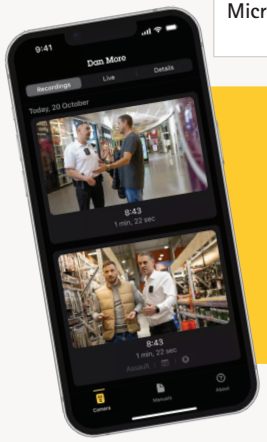

In-field charging

AXIS W102 and AXIS W120 Body Worn Cameras can be charged in the field using a standard cell phone charger that supports 5V and up to 3 amps.

Display icons
