The technology shift from analog to digital solutions is proceeding at a steady pace. The transition benefits Axis as the global market leader in network video. Axis continued to expand and added some 30 new employees during the period within the entire organization, with focus on research and development and the sales organization.

### Successful partner cooperation

Partner cooperation is an important element in Axis' success and during the quarter IBM announced that the company offers Axis' network video products as part of IBM's digital video surveillance solution. Axis' network cameras and video servers are currently being used in a number of pilot projects that IBM has installed at company customers in many industries, including retailing.

### **Customer installations**

Many significant installations were carried out during the first quarter of Axis' network video products. Axis' network video products were installed in the Moscow subway system, with the aim of increasing safety for passengers and personnel. The initial installation comprises 1,000 network video products, with the potential for additional installations.

In addition, another surveillance solution in the Education customer segments was installed. Middletown City Schools in Orange County, New York installed about 260 Axis network cameras during the first quarter.

### **Focus on products**

Axis continued to launch innovative products on the market and the company currently has the broadest product portfolio on the market. In March, the AXIS 233D network camera was launched, whose exceptional features facilitate surveillance of an extensive area where specific objects can be zoomed in and monitored at a long distance. The product can be installed advantageously at sport arenas, casinos, airports and in ports.

The AXIS 247S is a compact video server equipped with technology that powers the analog camera. The AXIS 247S is simple to install and provides customers with existing analog installations the possibility to utilize the advantages of network technology.

### **Axis STS solution**

At the beginning of the year Axis announced cooperation with Labs2 and Tryggare.net regarding the service tryggare.net, a service for private persons in Sweden. The service involves Axis STS network cameras linked to broadband in, for example, summer cottages, at home or other locations. Images can be viewed on a computer or a mobile telephone.

SuperOnline, a Turkish telecom operator in the Turkcell Group, launched the BabyCam service during the period. The solution is based on Axis' Subscriber Technology System (ST System), a solution optimized to offer cost-efficient service to private customers.

### **Worldwide interest**

During the first quarter, Axis participated in some 20 trade fairs around the world. The company's products attracted attention and high interest at Intersec Middle East in Dubai, Dustin Expo in Sweden, Retail Business Show in the UK, Security and Safety Technologies in Russia, SAFE 2007 in India, Tech Sec Solutions and ISC West in the US, Security Show in Japan and Secura in Belgium, among other shows.

## *Outlook for 2007*

---

Axis' overriding goal is to maintain and strengthen its position as the market-leading supplier of network-based video solutions for professional installations in an expanding market. According to market analysis institutes, this market will grow by 40 percent annually over the coming year. Moving into 2007, the company sees a market with favorable development potential for Axis but intensifying competition. To meet the competition, the focused strategy is retained and entails

- continuing to maintain an aggressive pace of product launches in the Video product area with a number of innovative products and solutions designed for professional installations
- increasing market presence through close cooperation with partners to optimize presence in the global market in a cost-efficient manner
- continuing to grow organically and attracting and recruiting skilled personnel on a global basis within specific areas.

## *Auditor's review report*

---

We have reviewed the interim report of Axis AB (publ) for the period of January 1 to March 31, 2007. The managing director and the board of directors are responsible for the preparation and presentation of this interim report in accordance with the Annual Accounts Act and IAS 34, Interim Financial Reporting. Our responsibility is to express a conclusion on this interim financial information based on our review.

We conducted our review in accordance with Standard on Review Engagements (SÖG) 2410 – *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing in Sweden (RS) and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that we would become aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not, in all essential respects, prepared in accordance with the Annual Accounts Act and IAS 34.
