

Axis Communications' Academy

Course description

Axis Video Management Software

AXIS Camera Station

Module Description

This training is a technical course that will give you the skills you need to successfully deploy and manage AXIS Camera Station. Topics such as installation and setup with automatic camera discovery, event configuration and efficient management of the Axis network video products in the system are explored in theory lessons combined with hand-on labs.

Target group

Professionals working with system integration and network video design that want to gain practical knowledge on how to use and configure AXIS Camera Station.

Prerequisites

It is recommended to have attended the Network Video Fundamentals classroom training.

Course objectives

You will learn how to:

- > Plan, install and use AXIS Camera Station
- > Set up events
- > Navigate between and play back recordings
- > Find incidents using Smart search
- > Handle camera and parameter management
