

Axis Communications' Academy

Course description

Mid-size Solutions Training

Length: 1 day
Format: classroom

Course description

Through presentations and hands-on lab exercises, you will learn how to successfully deploy an Axis end-to-end solution by using AXIS Camera Station and various Axis auxiliary devices, such as AXIS Network Door Station, AXIS C3003-E Network Horn Speaker, etc. Also, you will have a chance to do hands-on exercises on some of our ADP partner's ACAP applications and learn how it can bring benefits to your network video systems.

Course objectives

- > Understand features and how to configure AXIS Camera Station
- > Become familiar and understand the key benefits of the AXIS S10 Recorder Series
- > Learn how to make use of VAPIX® command in AXIS Camera Station to increase system flexibility
- > Understand how to configure Axis auxiliary devices and ACAP applications

Who should attend?

Professionals working with system integration and network video design.

Prerequisites

It is recommended to have attended Network Video Fundamentals or AXIS Camera Station classroom training or have basic network camera settings and configuration knowledge.
