

Axis Communications' Academy

Course description

Axis Video Management Software

Length: 1 day
Format: classroom

Course description

Axis Video Management Software is a technical course, giving you the skills you need to successfully deploy and manage:

- > AXIS Camera Station (5 hours)
- > AXIS Camera Companion (2 hours)

Video management software is explored in both theory lessons and hands-on labs.

Course objectives

AXIS Camera Station; you will learn how to:

- > Plan, install and use AXIS Camera Station
- > Set up events
- > Navigate between live view and play back recordings
- > Find incidents using Smart search
- > Handle camera and parameter management

AXIS Camera Companion; you will learn how to:

- > Install and use AXIS Camera Companion
- > Modify the configuration
- > Set up recordings and storage options
- > Retrieve and export recordings

Who should attend?

Professionals working with system integration and network video design.

Prerequisites

It is recommended to have attended the Network Video Fundamentals classroom training.
