Axis Communications' Academy

Hands on with Axis End-to-End Solutions

When you're designing a total solution, you need to know each piece to the puzzle and how to fit them all together.

Developed specifically for installers, technicians and designers, this training builds on your existing knowledge to offer all that's necessary to design scalable solutions for mid-sized businesses.

End to End Solutions provides hands-on design and configuration experience in creating a complete security system. You'll develop a smarter total solution using AXIS Site Designer, featuring cameras, access management, IP audio, and video analytics; all managed with AXIS Camera Station.

You'll leave the classroom confident in:

- > Improving solutions by aligning it with the customer's desired outcome
- > Reducing installation time and costs
- > Designing and implementing an Axis end-to-end solution
- > Creating further opportunity and increasing revenue with Axis products and services

Length: 1 day

Format: Classroom

Who should attend?

Individuals that will sell, support, install, configure, or manage a complete solution built from Axis products based off AXIS Camera Station

Prerequisites:

All attendees are required to take our AXIS Camera Station online course pre-requisites. Attendees may not be prepared for classroom hands-on exercises without a foundational understanding of AXIS Camera Station software prior to class.

Price: \$99

**Paid attendees will receive
16 AXIS Camera Station licenses!**
