

Axis tools

Just what you need
– when you need it

Hi, I'm Patch,
a system integrator. I use
Axis tools to save time and
to get surveillance systems
right from the start.

Scroll down and
I'll show you how!

AXIS
COMMUNICATIONS

09:02

*Kicking off the day with a cup of coffee
and a new quotation.*

It's easy to
compare products and
accessories. Using the filters,
I can find the right ones
super quick.

11:37

*At a customer site. The client changed
their mind...but no worries!*

I can work
with quotations so much
quicker. I can create, revise
and send out many
more each day.

13:42

*Helping a customer update
their massive surveillance system.*

You can update
thousands of devices
at the same time.

Easy and
cost-effective?
You bet!

17:15

*On the move.
But still in
business.*

No matter
where I am, I can
access these useful tools
and plugins, such as
CAD software.

And, they're
for free!

You too can use
the tools to save time
and create optimized
surveillance systems.

Sometimes
it feels like magic,
but you know, it's just
Axis tools.

Let's work together!

Go to the [Axis tools pages](#) to find out how you can
benefit. Regardless of project stage and task >>
