

# Deployable surveillance over LTE with Axis and Sierra Wireless

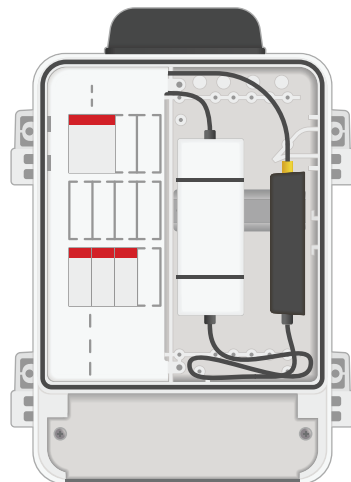

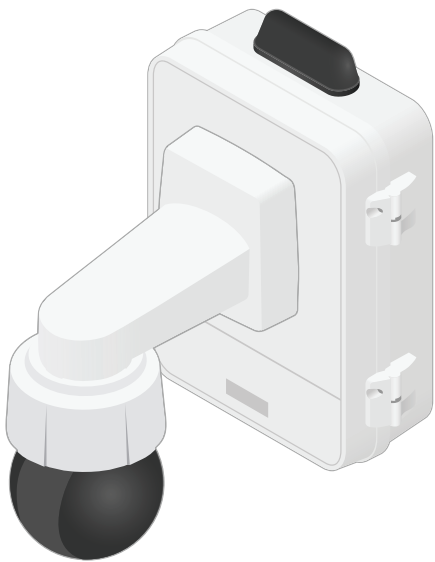

Employing LTE when a traditional network is impractical or unavailable.

Whether it's a city intersection, remote construction site or temporary concert, Axis Communications and Sierra Wireless offer a complete, 4G/LTE-enabled deployable surveillance station without the need for a dedicated network infrastructure.

By tapping into the increased available bandwidth in cellular networks, this convenient solution delivers cost-effective surveillance that can be easily set up and maintained or packed up and redeployed wherever you may need.

The Axis and Sierra 4G/LTE surveillance solution expands flexibility and scalability, reduces Total Cost of Ownership, minimizes service disruptions and is prepared for the most challenging conditions.

Ideal for temporary installations or installations requiring rapid and flexible deployment, a Sierra Wireless AirLink® 4G/LTE Gateway is contained within the robust AXIS T98A cabinet to which all Axis cameras can be connected.

## Solution components as shown

### Axis Communications

- > AXIS Q6315-LE Network Camera
- > AXIS T98A18-VE Surveillance Cabinet
- > AXIS T91L61 Wall Mount
- > AXIS Electrical Safety Kit A 120V AC
- > 25W DC step down transformer
- > AXIS T8154 60 W SFP Midspan
- > AXIS T91A03 DIN Rail Clip A

### Sierra Wireless

- > AirLink® LX40 LTE/Wi-Fi router (#1104573)
- > 4-in-1 Panel Antenna (#6001285)
- > DIN Rail Bracket (#6001221)

# Why Axis and Sierra Wireless?

## Axis T98-VE Cabinet Series

- > Ideal for use with Axis outdoor network cameras
- > Outdoor-ready, vandal, tamper and weather-resistant
- > Pre-configured or empty
- > Customizable with 5 different door variants
- > Designed for electrical safety in demanding conditions
- > Mounting plate included for simple installation and cable protection

## Sierra Wireless AirLink® LX40 Router

- > Carrier agnostic (LX40 is certified by Verizon, AT&T, and T-Mobile)
- > Up to 150 Mbps LTE downlink for optimal performance
- > Dual band Wi-Fi radios
- > Mil-STD-810G
- > Operating range of -22°F to 149°F
- > Option of DC or POE power
- > Compact size fits inside any AXIS T98 Cabinet
