

Top reasons for network door stations.

They make a **valuable complement** to any surveillance solution, providing **reliable visual identification** and **voice communication** with visitors to help keep areas secure 24/7.

Why choose network door stations?

Expand any security system

Axis network door stations connect to any video management system, so you can leverage an existing security solution to improve secure access.

Top-notch video and audio

Full-fledged Axis network video cameras include advanced technologies like Wide Dynamic Range (WDR) and great low-light performance, noise reduction and echo cancellation for always-reliable identification.

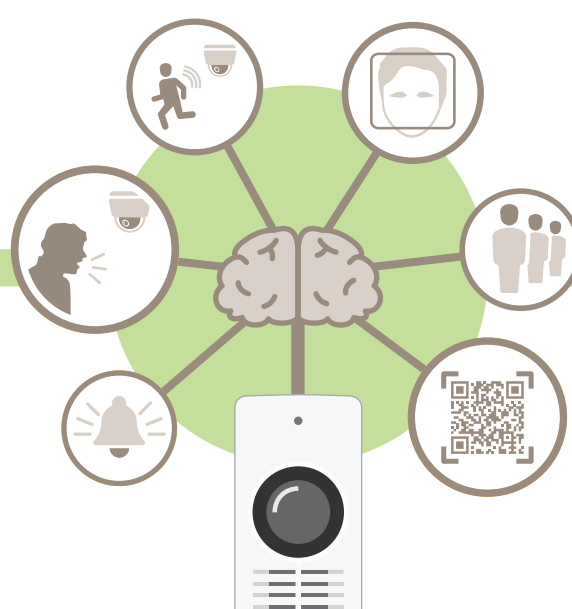

Direct or remote access control

Your customers can **see, talk to, identify**, and then open the door to visitors directly or remotely from a mobile device, IP phone or video management system.

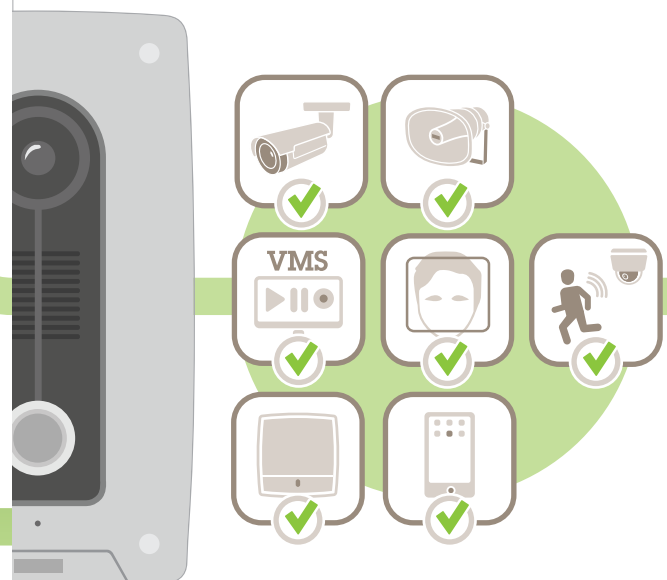

Smart analytics for extra security

Built-in intelligence and **audio and video analytics**, help keep your customers fully aware of what's happening outside their door.

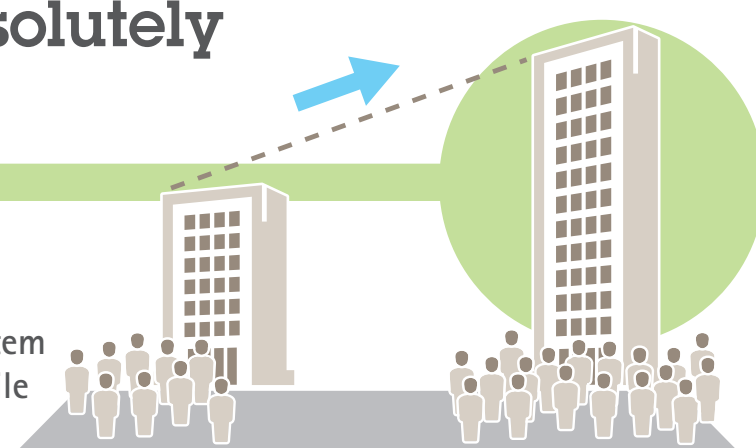

Complete freedom to choose

Open standards and interface provide freedom to mix and match best-of-breed hardware and software.

Scalability – absolutely future-proof

Add door stations, **expand** communication systems or **upgrade** the backbone of a system **as your customers grow**, while preserving the value of their investment.
