

# AXIS Camera Station

**Efficient surveillance  
and more.**

# Stay safe and secure

A solution using **AXIS Camera Station** is easy to use and maintain, which allows you to solve problems such as protecting your premises so you can focus on your core business.

You can also add functions to make operations more efficient and improve protection, such as easy communication with visitors, secure entrances and exits, add audio for deterrence and more. **AXIS Camera Station** allows you to build a scalable solution that covers all your surveillance needs.

**AXIS Camera Station** video management software puts efficient surveillance at your fingertips with an intuitive interface that's easy to operate – even for the occasional user.

## Key benefits

- > Effortless operation
- > Efficient surveillance
- > Easy to expand system

# Effortless operation

AXIS Camera Station software is built with the user in mind. The clear graphical user interface makes it easy for even occasional users to navigate, manage incidents and take action. It also supports over 20 languages making it available to a range of users world wide.

## AXIS Mobile Viewing app

AXIS Mobile Viewing app allows you to keep up with events from your premises. It offers easy access to multiple systems and features such as live view, control of PTZ (pan/tilt/zoom) cameras , time-line visualization of recorded events and the export of video.

## Clear identification

Intuitive control of PTZ cameras and support for panoramic and multi-sensor cameras provide complete site awareness and clear identification of incidents.

## Powerful event handling

You can receive notifications, handle events and trigger actions from a variety of sources, such as video analytics, radar and other inputs.

## Quick video search, retrieval and export

Search through footage from multiple cameras at the same time with the scrubbing function. Smart search functionality enables speedy search through hours of HD recordings in just a few seconds, while the timeline visualization enables quick retrieval and export of evidence.

## Intuitive user interface

The user interface features flexible, live-view layouts, maps and display of web pages. The layout can be adapted to the operator's daily needs using simple drag-and-drop tools. Action buttons can also be included to remotely open doors for visitors or control other devices. Alarms are clearly visible, allowing the operator to take immediate action

# Efficient surveillance...

## Camera portfolio meeting your needs

Whether you require robust outdoor cameras, discreet products for sensitive environments, thermal cameras or even panoramic cameras, there's an Axis network camera to suit the surveillance needs of your premises. Our cameras provide excellent HDTV video for identification, regardless of lighting conditions, size, and/or layout of the monitored areas.

## Easy access to useful camera functions

With AXIS Camera Station, you benefit from camera features that make surveillance more effective. These include a corridor format for effective surveillance of narrow hallways, Electronic Image Stabilization to secure clear video in situations where a camera is subject to vibrations, easy camera output control to manage external devices such as lights, sirens, and more. To further increase system reliability, AXIS Camera Station supports fail-over recording by temporarily storing images in the network camera SD card.

## AXIS Camera Station for clear identification

The core in AXIS Camera Station is high performing video rendering that provides sharp, jitter-free video – even in scenes with fast moving objects. To further facilitate identification and save storage space, AXIS Camera Station offers easily scalable, on-camera Video Motion Detection with false alarm filtering. The videos are safely exported to authorities, and can easily be viewed with the provided file player.

## Out-of-the-box or built-by-you

With Axis, you won't just get the right system to suit all your needs – you'll also get first-class support. Choose an end-to-end solution that's ready to record with one of our out-of-the-box ready recorders preloaded with AXIS Camera Station. Or, build your own system using our software with standard PCs and servers. The choice is yours. Whatever system you choose, you can rely on the best performance and the flexibility to adapt your system to grow with you.

# ...and more

## Get the maximum out of Axis wide range of products and technologies

As your needs grow, you can grow your Axis system, too. It's a reliable investment that provides everything you need to support your operations – all from one supplier.

### More benefits for you

#### Improved security with speakers

Set up triggered or scheduled messages for remote communication with staff or to deter intruders.

#### Control of other equipment

Include an I/O module to your system to connect door switches, control lights, open/close barriers and more.

#### Handle deliveries and visitors

Add a door station to your system to identify and communicate with visitors, and control their entry.

#### Add analytics

To improve surveillance efficiency choose an application from Axis or discover other intelligent solutions provided by Axis partners in the ACAP gallery.

## Innovation is always included

### Electronic image stabilization (EIS)

Cameras mounted on high poles or near busy roads can be shaken by winds or passing traffic, and images are often blurry and troublesome to view. EIS effectively minimizes the effects from vibration and shaking to give you reliable images and cost-effective installation.

### Lightfinder

Cameras with Axis Lightfinder technology have extreme light sensitivity and can deliver color images in as little light as 0.18 lux. The noise reduction is also vastly improved compared with any surveillance camera on the market, which, in combination with the light sensitivity of the sensor, results in superior image quality.

### Zipstream

Axis Zipstream technology consists of a collection of dynamic features that analyze and optimize the network camera's video stream in real-time. Scenes containing interesting details are recorded in full quality and resolution, while non-essential areas are filtered out for optimal use of bandwidth and storage.

### WDR - Forensic Capture

Sophisticated algorithms lower noise levels and increase the image signal so every detail in the scene is displayed in the best possible way. The result is video that's highly optimized for forensic purposes, ensuring all details are captured in both dark and bright areas at the same time – even in scenes with complex lighting conditions.
