

Critical infrastructure solutions

Always protected

Intrusion

Keep your site safe from perimeter to critical core

Operations

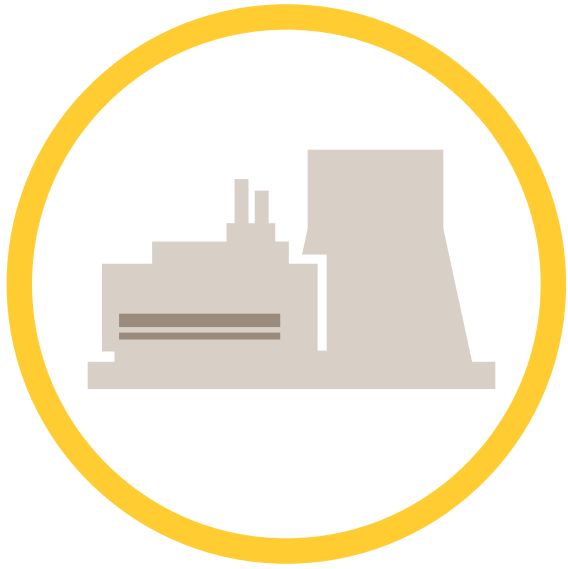

Improve your operational efficiency

Health & safety

Ensure the health and safety of your personnel

Protecting the **heart** of your operations.

What if you could protect your facility, your critical operations and your employees from intrusion, interruption and injury with a single integrated system? Axis critical infrastructure solutions go beyond physical security to address every aspect of critical infrastructure protection. The result is a more secure site, efficient and safe operations - in every step of your supply chain.

Safeguard your site from perimeter to critical core

- > Detect, verify, identify, track and deter intruders in real time
- > Effectively handle alarms by assessing the validity of a threat - and act swiftly
- > Manage multiple sites from a centralized control room

Keep your critical operations up and running

- > Visually verify production and temperature data
- > Visually assess reported failures
- > Facilitate predictive maintenance and trend monitoring

Ensure the health and safety of your personnel

- > Visually monitor policy adherence and evaluate risks in real time
- > Keep track of the number of individuals in each area of a facility
- > Audio support for deterrence and risk mitigation

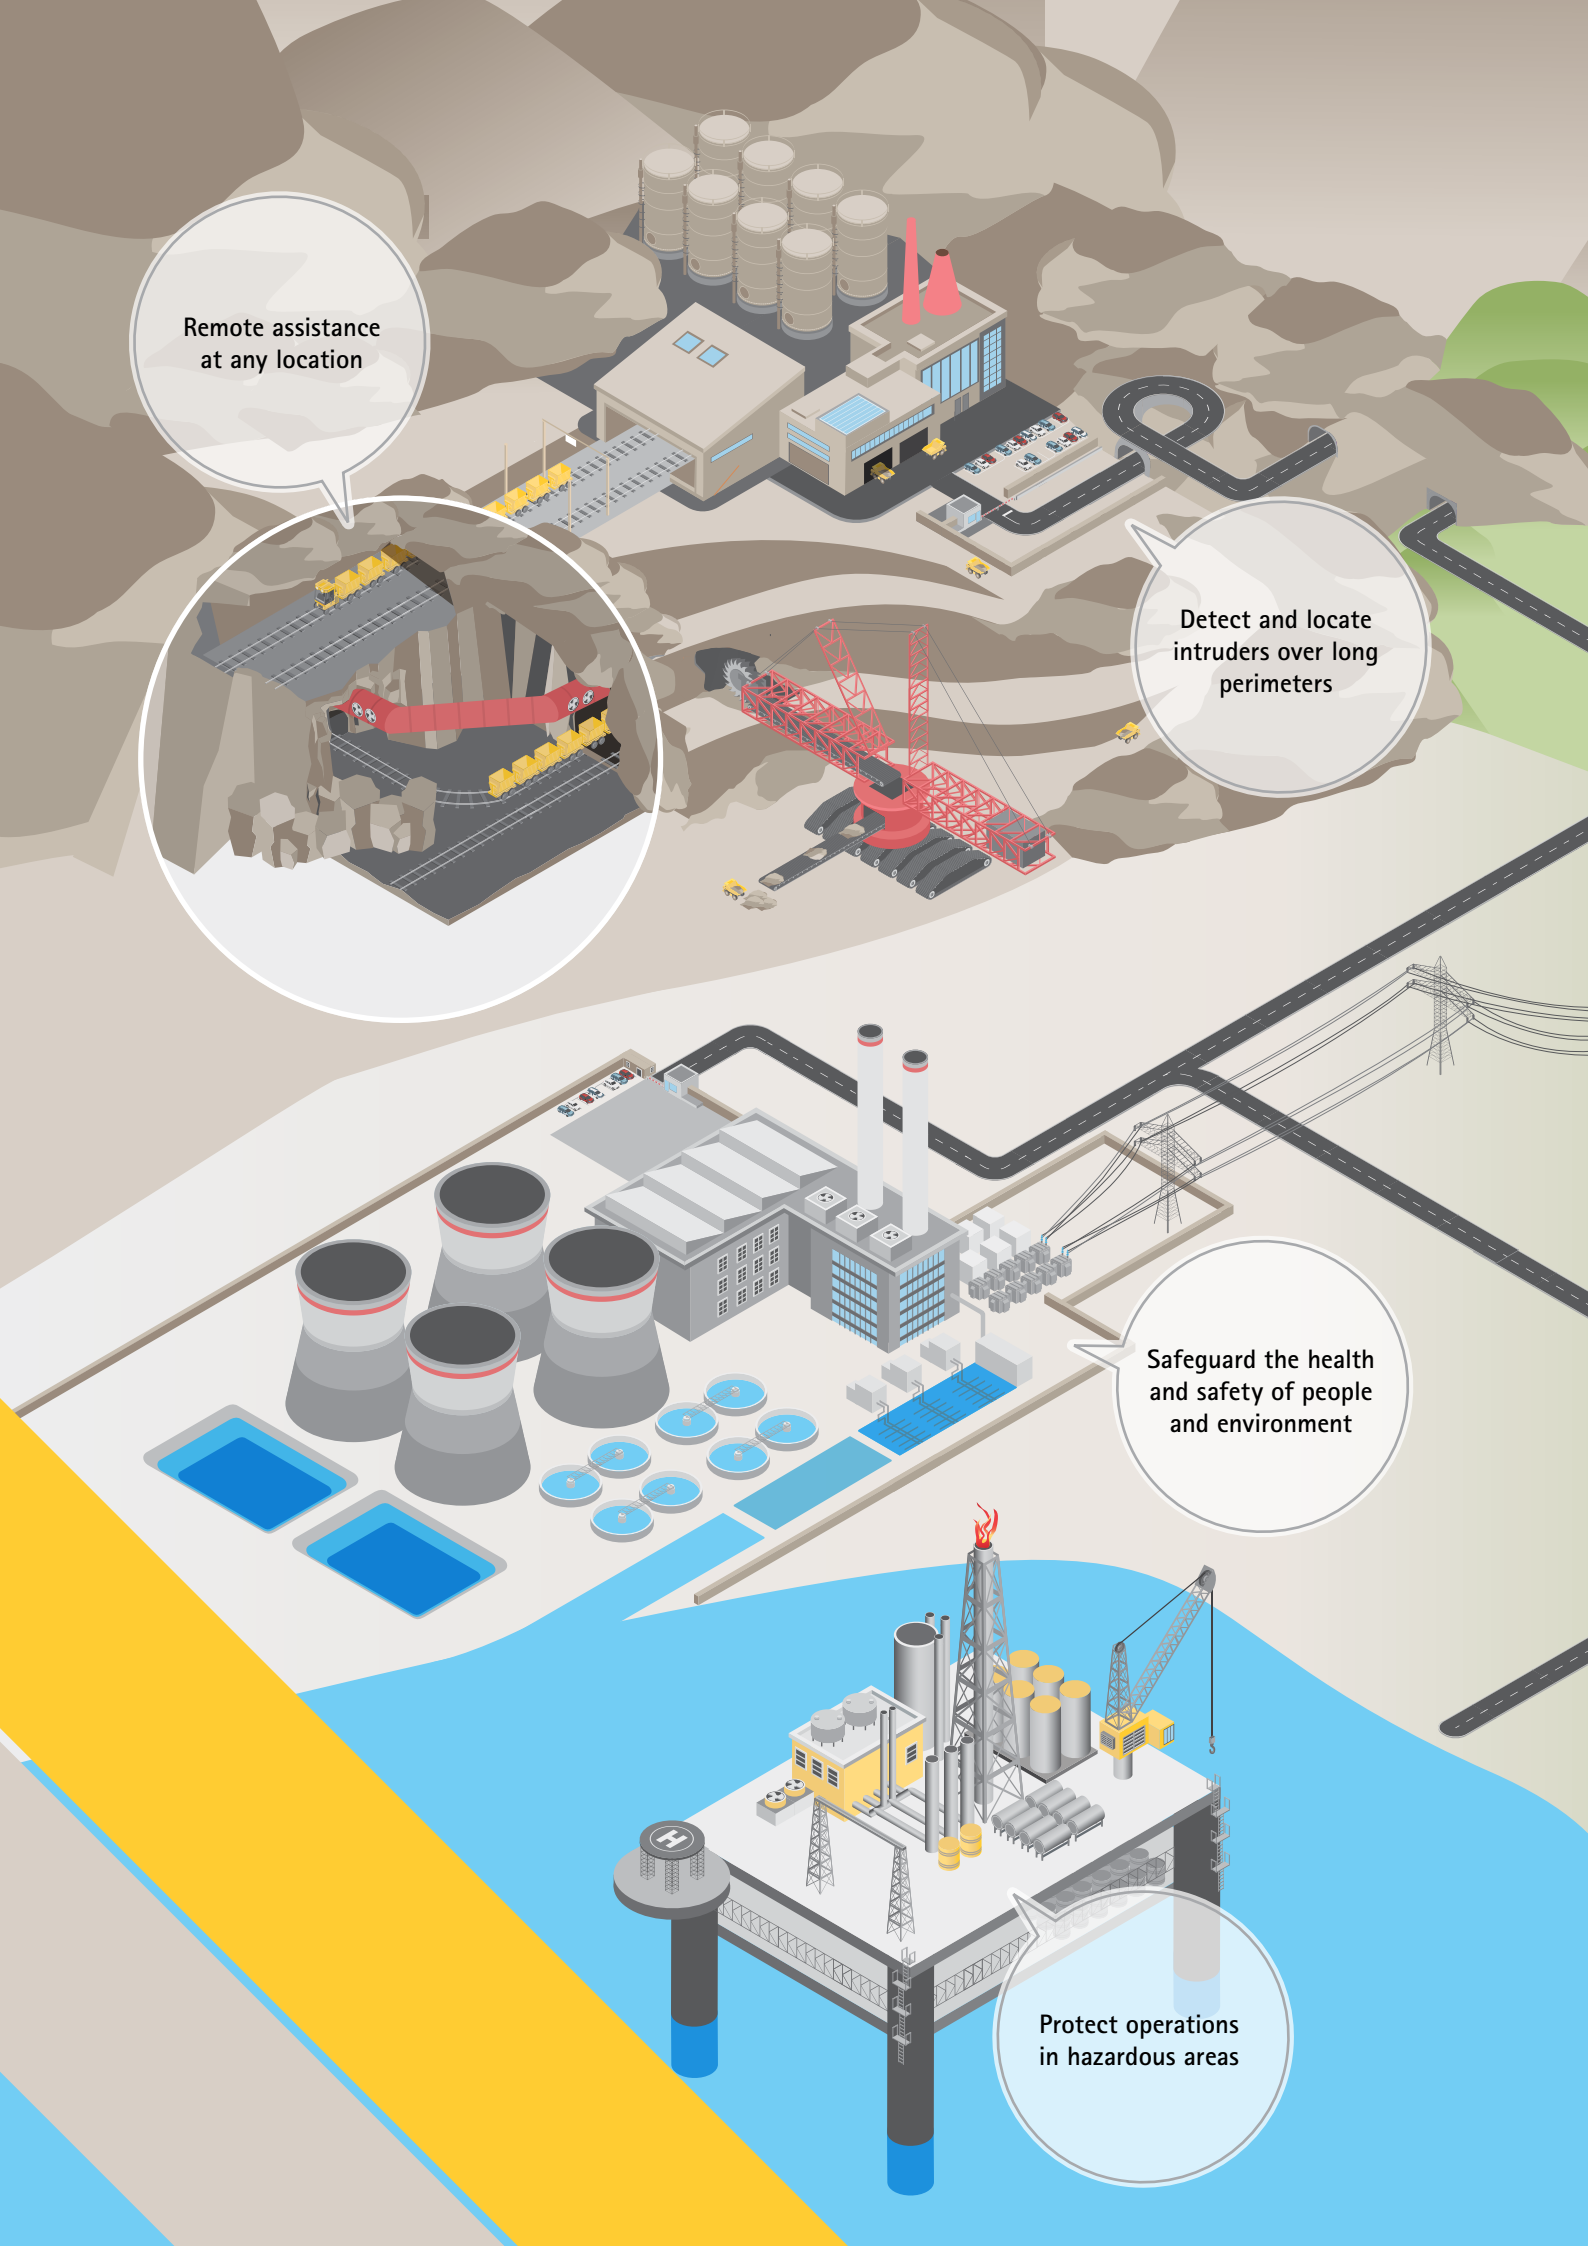

Verify potentially disruptive cyber attacks

- > Network video products with built-in protection
- > Best practices in the design, development and testing of our products
- > Responsiveness and transparency when new critical vulnerabilities are discovered

Global partner network

- > Complete system reliability
- > Local expertise, service and support
- > Professional services for system design, installation and configuration
