

# Advanced Configuration & Troubleshooting

**Length:** 1 day  
**Format:** classroom

## Course description

This 1-day advance training course aims to provide in-depth knowledge in Axis product configuration and polish your troubleshooting skills, helping you to efficiently bring your project up to full operation through presentations and demonstrations as well as hands-on lab exercises.

## Course objectives

You will learn:

- > Comprehensive knowledge in setting up and configuring Axis product
- > Advance troubleshooting skills by using Axis and third-party tools

## Who should attend?

Engineers who are responsible for product installation and supporting project implementation, and want to polish their troubleshooting skills.

## Prerequisites

Students must have attended Network Video Fundamentals classroom training before and have basic networking knowledge.
