

Axis Communications' Academy

Course description

Business Start-up Course

Length: 1 day

Format: classroom

Course description

The Business Start-up Course covers necessary basic knowledge and skills needed to start up your business as a network video solution provider. This 1-day classroom training not only will introduce the process of building a network video surveillance system thru presentations, but also will let you experience the building process by hands-on lab exercises.

Course objectives

You will learn:

- > The foundation of network video surveillance system and its components
- > Building network video surveillance system through hands-on exercises
- > Warranty and Axis sales and technical support

Who should attend?

Sales or sales engineers who are new to network video surveillance industry or are not familiar with network video solution, and would like to gain basic knowledge on network video before joining other Axis Communications' Academy trainings.

Prerequisites

None.
