

Axis Communications Academy

Course description

Essentials to Audio Solution

Length: 1 day
Format: classroom

Course description

Essentials to Audio Solution is a full day classroom training introducing Axis network audio systems. You will learn how a network audio system can be used intelligently for security and non-security scenarios, or even work similar to an IP phone using SIP protocol. The course will contain both presentations and hands-on lab exercises

Course objectives

You will:

- > Learn the advantage of network audio and how to set up and configure Axis network audio systems
- > Become familiar with basic VAPIX® in Axis audio devices
- > Learn how to integrate Axis network audio devices with SIP protocol and PBX
- > Understand how network audio systems could be used in different solution scenarios
- > Learn how to build up an Axis audio solution easily by VAPIX®, ACAP and event configuration

Who should attend?

Professionals working with system integration or audio integration.

Prerequisites

None.
